So overall, the results show their performance to be above average compared to the industry.

Max Fashion ranks second in awareness within the everyday fashion market

Brand KPIs & benchmarking: awareness

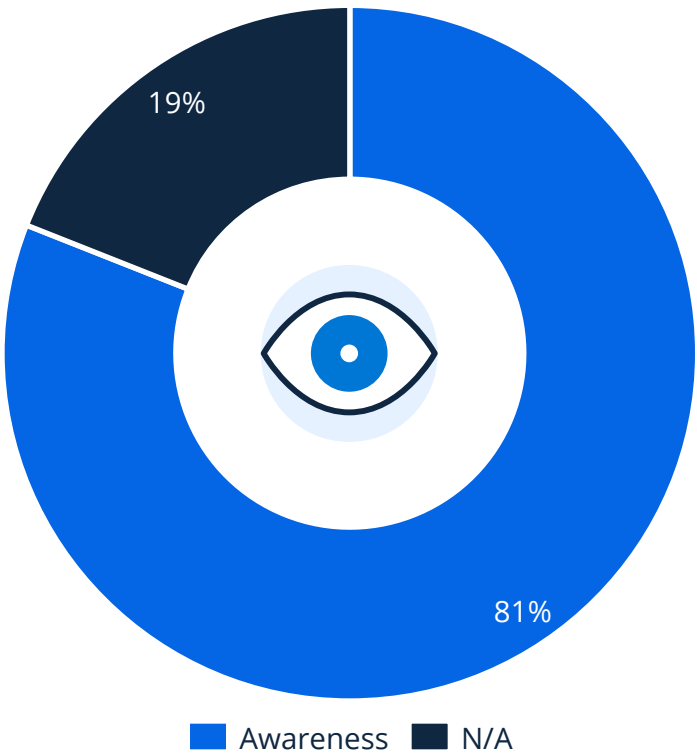

Summary

Driving recognition will lead to growing your customer base and measuring brand awareness is a key component to achieve this. With this score, you can gauge the current market presence of a brand, understand the brand’s visibility, competitiveness, and recognition among their target audience. Further to this, it is a perfect way to assess your current marketing strategies.

Using the concept of aided brand recognition, showing respondents both the brand’s logo and the written brand name, we asked: “Do you know this brand, even if only by name?”.

Out of all respondents, 81% were aware of Max Fashion. This ranks them second compared to other brands surveyed in this market.

Awareness of Max Fashion

Rank #	Brand	Awareness %
1	H&M	83%
2	Max Fashion	81%

Sources: Statista Consumer Insights Global, as of April 2025

In terms of loyalty, Max Fashion is second in India

Brand KPIs & benchmarking: loyalty

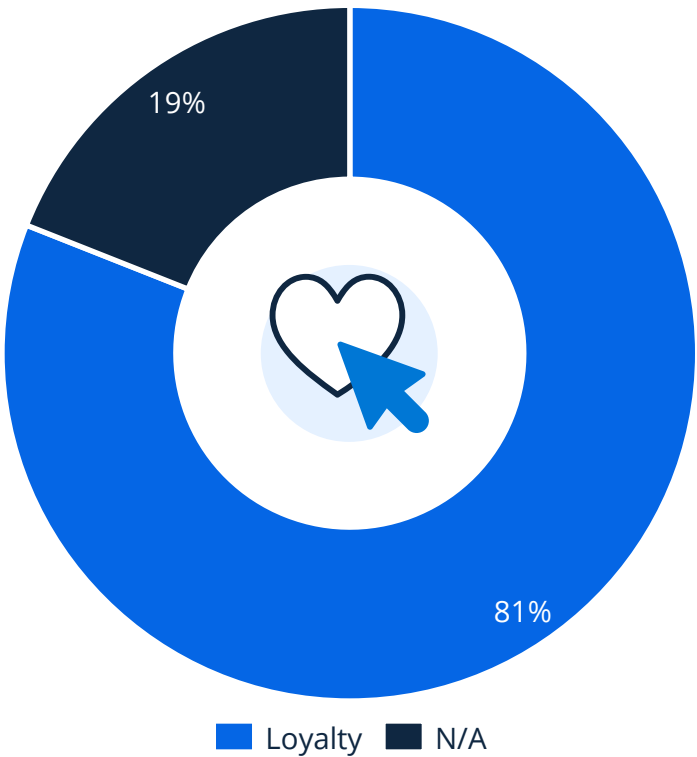

Summary

After ascertaining the ownership of a brand in the last 12 months, the next most important indicator is brand loyalty. This score allows us to establish whether a brand is performing well in regard to customer retention. Measuring brand loyalty establishes a clear feedback loop with customers, providing valuable insights into customer satisfaction and preferences. It is also a powerful predictor to help guide marketing strategies and forecast future sales and revenue more accurately.

To measure the loyalty of these consumers we ask each respondent: “When it comes to everyday fashion, which of the following brands are you likely to purchase again in the future?”.

Out of respondents who have owned Max Fashion, 81% said they would purchase the brand again.

Loyalty of Max Fashion’s consumers

Rank #	Brand	Loyalty %
1	H&M	85%
2	Max Fashion	81%
