June 2026 | For Internal Research Use

01 · Executive Summary & Key Signals

India's apparel market is on a steep upward trajectory — from ■5.48T today to a projected ■10.68T by FY2027 — driven by rising incomes, brand premiumisation, and a digitally engaged, aspirational Gen Z & Millennial cohort that forms the core of premium fashion demand.

■10.68T Projected apparel mkt FY 2027 (INR)	\$180B Total textile & apparel value FY 2031 (USD)	50% Branded apparel share FY 2023 → 59% by 2027	10% Apparel retail sales growth (Jun 24–Jun 25)
--	---	--	--

Signal	Theme	Insight
■	Market scale	India is the world's 3rd largest apparel revenue market (\$105.5B in 2024), behind US and China.
■	Growth trajectory	Market nearly doubles from FY2023 to FY2027 — the steepest projected jump in any 4-year window in recent history.
■ ■	Premiumisation wave	Branded apparel share jumped from 32% (FY2015) to 50% (FY2023) — heading to 59% by FY2027.
■	Consumer evolution	Premium consumers are younger (44% Gen Z), higher-income (46% top tercile), and metro-concentrated (41% in megacities).
■	Digital-first reach	79% of premium fashion consumers engage with social media ads; Instagram leads at 91% penetration.
■	Export pressure	Textile & apparel exports peaked at \$44.4B in FY2022 but have since retreated — domestic demand is the growth engine.
■	Western vs Ethnic	Western wear dominates at ~70% market share, but ethnic wear is projected to nearly double by FY2027.
■ ■	Gender skew	Men slightly outnumber women (53% vs 47%) among premium fashion consumers — counterintuitive for fashion.

02A · SOURCE 1 — General Overview & Market Size

Source: Statista — Apparel Market in India (Industry & Markets Report)

Global Context: India's Position

In 2024, India ranked 3rd globally in apparel market revenue at \$105.52B, trailing only the US (\$358.7B) and China (\$302.6B). India's trajectory is notably steeper than most mature Western markets, positioning it as the primary growth frontier in global apparel through 2029.

Rank	Country	2024 Revenue (US\$B)	Trend	Context
1	United States	\$358.7B	Stable growth	Largest but maturing
2	China	\$302.6B	Moderate growth	Large domestic + export
3	India	\$105.5B	Steep growth ↑	Fastest growth major mkt
4–5	Japan / Germany	~\$75–85B	Flat/slow	Saturated markets

02B · SOURCE 1 — Production Landscape

India is the world's largest producer of textiles and garments. Production data reveals COVID disruption in FY2021 followed by recovery, with man-made fibres showing the most consistent upward trajectory — signalling a structural shift in fabric preferences.

Total Cloth Production

FY	Total Cloth (Bn sq.m)	Cotton Fabric	Non-Cotton Fabric	Blended Fabric
FY 2016	64.6	4.14	1.53	1.16
FY 2018	67.77	4.06	1.62	1.19
FY 2019	71.05	4.21 (peak)	1.68	1.16
FY 2020	63.34	3.96	1.70	1.69
FY 2021	~est. low	3.63	1.52	1.33
FY 2022	—	4.06	1.76 (peak)	2.02 (peak)
FY 2023	—	3.44	1.74	1.90

Source: India Brand Equity Foundation; Textile Machinery Manufacturers' Association

Man-Made Fibre — Structural Growth Story

FY	MMF Production (Mn MT)	Change vs FY2016	Signal
FY 2016	1.35	Base	Stable low base
FY 2019	1.44	+6.7%	Gradual uptick
FY 2020	1.89	+40%	Inflection point
FY 2022	2.16	+60%	Post-COVID surge
FY 2023	2.15	+59%	Sustained high level

Source: India Brand Equity Foundation; Textile Machinery Manufacturers' Association

KEY PRODUCTION INSIGHT: Man-made fibre production grew 60% between FY2016 and FY2022 — reflecting structural demand shifts towards synthetic blends, sportswear, and fast-fashion formats. Cotton remains dominant in export (RMG cotton = \$9.4B in FY2025) but domestic consumption is pivoting.

02C · SOURCE 1 — Market Segments

By Gender — Market Size (■T)

Segment	FY 2018	FY 2021 (COVID)	FY 2023	FY 2027E	Growth FY23→27
Women's Apparel	■3.66T	■3.06T	■5.48T	■10.68T	~95%
Men's Apparel	■1.52T	■1.27T	■2.23T	■4.32T	~94%
Kids' Apparel	■799B	■683B	■1.24T	■2.38T	~92%

Source: Style Baazar; Technopak Advisors. Note: Women's & total apparel figures aligned.

By Category — Western vs Ethnic Wear

Category	FY 2018 (■T)	FY 2023 (■T)	FY 2027E (■T)	FY23 Share	Strategic Note
Western Wear	~■2.5T	~■3.9T	~■7.5T	~70%	Dominant; casual + formal
Ethnic Wear	~■1.2T	~■1.6T	~■3.1T	~30%	Growing fast; festival + wedding

Source: Style Baazar; Technopak Advisors

SEGMENT INSIGHT: Women's apparel represents the largest absolute segment (■5.48T, FY23) and is expected to nearly double by FY2027. Western wear commands ~70% market share, but ethnic wear growth is accelerating — driven by wedding-season demand and 'festive dressing' culture.

02D · SOURCE 1 — Retail Dynamics

Apparel's Share of Total Retail Market

FY	Share of Retail (%)	Apparel Retail Value	Context
FY 2018	7.4%	—	Pre-COVID baseline
FY 2020	7.5%	—	Peak pre-COVID
FY 2021	5.3%	—	COVID collapse
FY 2022	6.1%	—	Recovery
FY 2023	7.2%	~₹6T	Near full recovery
FY 2027E	9.4%	—	Structural gain in share

Source: Style Baazar; Technopak Advisors

Branded vs Unbranded Apparel Penetration

FY	Branded Share	Unbranded Share	Implication
FY 2015	32%	68%	Largely unorganised market
FY 2020	45%	55%	Strong premiumisation
FY 2022	48%	52%	Crossing near-parity
FY 2023	50%	50%	Milestone: equal split
FY 2027E	59%	41%	Brands will dominate

Jewellery	9%	#3	—
Consumer Durables & Electronics	9%	#3	—
Furniture & Furnishing	8%	#6	—
Footwear	7%	#7	—
Food & Grocery	7%	#7	—
Beauty, Wellness & Personal Care	6%	#9	Slowest in list

Source: Retailers Association of India, Jun 2025

02E · SOURCE 1 — Export Performance

India is the world's 2nd largest textile & clothing exporter. However, exports have retreated from their FY2022 peak of \$44.4B, signalling that domestic demand — not exports — is now the primary growth driver. Cotton-based garments dominate export value.

Textile & Apparel Export Value (FY2018–2024)

FY	Total Exports (US\$B)	YoY Change	Context
FY 2018	\$36.8B	—	Pre-COVID baseline
FY 2019	\$37.5B	+1.9%	Marginal growth
FY 2020	\$34.2B	-8.8%	Slowdown
FY 2021	\$29.9B	-12.6%	COVID disruption
FY 2022	\$44.4B	+48.5%	Historic peak — post-COVID pent-up
FY 2023	\$36.7B	-17.3%	Normalisation
FY 2024	\$35.9B	-2.2%	Continued softness

Source: India Brand Equity Foundation

Top Export Categories by Value (FY2025)

Category	Export Value (US\$ Mn)	% of Total*	Strategic Note
RMG Cotton (incl. accessories)	\$9,381M	~25%	Dominant category
Cotton Fabrics & Madeups	\$7,009M	~19%	Raw/semi-processed
Manmade Yarn, Fabrics & Madeups	\$4,869M	~13%	Rising rapidly
RMG Others	\$3,600M	~10%	—
Cotton Yarn	\$3,553M	~9%	—
RMG Manmade Fibres	\$2,749M	~7%	Growing segment
Handicrafts (excl. handmade carpets)	\$1,767M	~5%	Artisan / heritage

Source: Department of Commerce (India); DGCI&S; FY2025. *Approximate share of ~\$37.5B total.

02F · SOURCE 1 — Key Players

Leading Textile & Apparel Companies by Net Sales (as of Feb 2025)

Rank	Company	Net Sales (■B)	Primary Focus	Notable Fact
1	Welspun Living	■80.85B	Home Textiles	Asia's largest towel maker; exports 94%+
2	Arvind Ltd	■71.00B	Textiles / Brands	Diverse; denim, fabrics, fashion brands
3	Trident	■67.30B	Home Textiles	Integrated textile manufacturer
4	Alok Industries	■53.56B	Polyester / Textiles	Post-restructuring recovery
5	Page Industries	■45.82B	Innerwear / Athleisure	Jockey India licensee

Source: Moneycontrol, as of February 2025

Men's Apparel Brand Revenue Leaders (FY2023)

Rank	Brand / Company	Revenue (■B)	Portfolio / Notes
1	Aditya Birla Fashion & Retail (ABFRL)	■124.2B	Louis Philippe, Van Heusen, Allen Solly, Peter England, Forever 21 (women's)
2	Arvind Fashions Ltd	■44.2B	Arrow, US Polo, Tommy Hilfiger, CK India
3	PVH Arvind Fashion	■10.2B	Calvin Klein, Tommy — premium positioning
4	Benetton India	■9.2B	International casual; mid-premium
5	Kewal Kiran Clothing	■7.8B	Killer, LawmanPg3 — mass-premium jeans

Source: Technopak Advisors, FY2023

COMPETITIVE LANDSCAPE: ABFRL dominates men's branded apparel with 3x the revenue of the second player. The top-2 players (ABFRL + Arvind Fashions) collectively hold a disproportionate share, suggesting significant concentration at the branded premium tier.

03A · SOURCE 2 — Premium Fashion Consumers: Demographic Profile

Source: Statista Consumer Insights Global — Premium Fashion Consumers in India (March 2026)

Survey base: n=1,307 premium fashion consumers vs n=24,164 all respondents. Internet users, 18–64.

Age Profile — Target vs General Population

Generation	Age Range (approx.)	Premium Fashion Consumers	All Respondents	Delta	Implication
Gen Z	18–26	44%	51%	-7pp	Gen Z is actually smaller share vs baseline — Millennials close behind
Millennials	27–42	40%	32%	+8pp	OVER-indexed — key spenders
Gen X	43–58	15%	16%	-1pp	Parity with market
Baby Boomers	59+	2%	1%	+1pp	Negligible

04 · Cross-Source Synthesis — Strategic Themes

The two reports tell a unified story: India's apparel market is transitioning from a volume-driven, unorganised sector to a brand-led, premiumising consumer market — fuelled by a confident, digitally-savvy, metro-concentrated Millennial and Gen Z cohort.

THEME 1: The Premiumisation Megatrend

Market data shows branded apparel share rising from 32% (FY2015) to a projected 59% (FY2027). Consumer data confirms the engine: 100% of premium consumers affirm brand value, 64% have a favourite brand, and 67% are trend-driven buyers. These two signals reinforce a durable structural shift away from unbranded goods.

THEME 2: Metro-Concentrated, High-Income Core

41% of premium fashion consumers live in megacities (5M+ population), 46% are in the top income tercile, and 42% hold master's degrees. Cross-referenced with market data: this cohort sits in cities like Mumbai, Delhi, Bengaluru, Hyderabad — where organised retail and e-commerce penetration is highest. Tier-2/3 remains the next frontier but is not yet the core.

THEME 3: Millennial Sweet Spot — Often Missed

Contrary to the common 'Gen Z is everything' narrative, Millennials are the most over-indexed generation among premium fashion consumers (+8pp vs base). They have spending power, brand loyalty (64% have a favourite brand), and consume across every media channel. Gen Z leads in raw numbers but Millennials are the quality buyer.

THEME 4: Digital-First But Omnichannel in Reality

79% engage with social media ads, 91% use Instagram — yet 51% encounter ads directly in-store and 65% say try-on is essential. The premium Indian fashion consumer is digital-native for discovery but physical-world-dependent for purchase. Brands that nail omnichannel (Instagram browse → store try-on → online purchase) win.

THEME 5: Cricket as a Cultural & Commercial Gateway

90% of premium fashion consumers follow cricket — 3pp above the general population. The sport is also the most participated (64%). For fashion brands targeting this group, IPL sponsorships, player endorsements, and cricket-adjacent campaigns offer disproportionate reach.

THEME 6: Domestic Demand > Exports (New Reality)

Textile exports peaked at \$44.4B in FY2022 and have since retreated to \$35.9B. The domestic market, however, is doubling (FY2023 → FY2027E). India's apparel growth story is fundamentally a domestic consumption story, not an export story. Brands serving Indian consumers are in the right lane.

THEME 7: Western Wear Dominates, Ethnic Has Upside

Western wear at ~70% share is the dominant category, but ethnic wear is set to nearly double by FY2027 (~■3.1T). Consumer data shows 55% are interested in Fashion & Beauty (+12pp vs average). The fusion/indo-western niche — already a cultural phenomenon — has commercial tailwinds.

THEME 8: Women's Apparel: Largest Segment, Strong Growth

Women's apparel (■5.48T, FY2023) is the single largest segment and projected to reach ■10.68T by FY2027. Yet among premium fashion consumers, women are slightly under-indexed (47% vs 46% base). This suggests a significant untapped premium opportunity specifically for women's fashion — the mass market is large but premiumisation of women's wear is still maturing.

05 · Thesis Directions & Presentation Angles

Use this section to align your raw data with the macro landscape. Each thesis angle below draws from both reports and points to where your scraped/collected data can add primary evidence to validate (or challenge) these narratives.

THESIS A: The Indian Premium Apparel Opportunity

Central argument: India is at an inflection point in premium fashion adoption — market size doubling, brand penetration crossing 50%, and a uniquely aspirational consumer base. Your data should validate: Where is this growth happening? Which brands / platforms are capturing it? What are the pricing dynamics in premium vs mass?

Data you need from your research:

- Market size & growth charts (from Source 1)
- Branded apparel penetration trend
- Consumer income/education profile (Source 2)
- Your data: sales data, brand revenue, pricing data from scraped sources

THESIS B: The Digital-to-Physical Fashion Consumer Journey

Central argument: Premium Indian fashion consumers discover digitally (Instagram 91%, YouTube 88%) but require physical touchpoints to convert (try-on: 65%, in-store ads: 51%). Pure D2C play is insufficient; omnichannel is essential. Your data should validate: Online vs offline sales mix, digital ad spend by brands, conversion rates across channels.

Data you need from your research:

- Social media penetration data (Source 2)
- Ad touchpoint data (Source 2)
- Retail share data (Source 1)
- Your data: brand marketing spends, online sales trends, app data

THESIS C: Millennial vs Gen Z: Rethinking the Target Consumer

Central argument: Conventional wisdom targets Gen Z for fashion, but Millennials are the most over-indexed premium consumers (+8pp). They combine spending power with brand loyalty and multi-channel media consumption. Fashion brands under-investing in Millennials are leaving money on the table. Your data should validate: Age-cohort spend analysis, brand campaign targeting data, price point by age group.

Data you need from your research:

- Age cohort data (Source 2)
- Life values and interests data (Source 2)
- Your data: consumer surveys, purchase data by age cohort, brand targeting analysis

THESIS D: Western Wear Dominance & The Ethnic Wear Opportunity

Central argument: Western wear holds ~70% market share but ethnic wear is growing faster. The real opportunity may be in Indo-Western fusion or occasions-based ethnic dressing. Your data should validate: Category growth data, consumer occasion data, search trend data for ethnic vs western.

Data you need from your research:

- Market segment data (Source 1)
- Consumer interest in fashion (Source 2)
- Your data: search volume data, social media trend data, brand category revenue splits

THESIS E: The Export Paradox: India's Textile Strength vs Domestic Opportunity

Central argument: India is the world's 2nd largest textile exporter, yet domestic premiumisation offers a far larger and more structurally durable growth opportunity than volatile export markets. Companies pivoting from export to domestic premium are making the right strategic call. Your data should validate: Export vs domestic revenue splits of listed companies, margins on domestic vs export, capex direction of major players.

Data you need from your research:

- Export value data (Source 1)
- Market size domestic data (Source 1)
- Key player revenue data (Source 1)
- Your data: company filings, investor presentations, capex data

Quick Reference: Thesis-to-Data Mapping

Thesis	Core Question	Key Stats from Reports	Your Data Gaps to Fill
A — Premium Opportunity	How big & fast?	■5.48T→■10.68T; branded 50%→59%	Brand revenue, pricing, unit economics
B — Digital-Physical Journey	How do they buy?	Instagram 91%; try-on 65%; in-store 51%	Online/offline sales mix; conversion funnels
C — Millennial vs Gen Z	Who really spends?	Millennials +8pp over-indexed	Age-cohort spend; CLV by generation
D — Western vs Ethnic	What categories?	Western 70%; Ethnic to ■3.1T by 2027	Category growth rates; search trends
E — Export vs Domestic	Where's the value?	Exports \$36B (falling); domestic doubling	Company domestic vs export splits; margins

NEXT STEP: Share your raw research data (scraped data, surveys, company filings, pricing data). We will map each data point to the thesis framework above, identify gaps, and build a coherent narrative for your presentation backed by both the macro context (these reports) and your primary/scraped evidence.
