FOREWORD

The DE&S compiles the Gross Domestic Product (GSDP) estimates on par with NAD, NSO as per the standardized procedures and methodology. DE&S, A.P., is also one of the few organizations which compiles regional accounts (DDP) for the state as per the prescribed methodology. The DDP estimates throw light on the performance of the districts in various sectors of the economy.

This publication contains the sector-wise estimates of GVA and GSDP from 2011-12 to 2024-25 (AE).

District & Sector Wise Gross District Domestic Product, Sector-wise Gross Value Added and inter-district ranking from 2023-24 (FRE) both at Current prices and Constant (2011-12) Prices is prepared.

I thank all the line departments for extending their cooperation for preparation of estimates. I appreciate the sincere efforts of officers and staff of Directorate of Economics & Statistics involved in bringing out this publication.

I hope this publication will be useful to all stake holders like Scholars, Economists, Industrialists and other persons who are interested in the subject. Any suggestions for the improvement of this publication are highly appreciated.

Vijayawada

Dated: 13 - 10 - 2025

GROSS STATE DOMESTIC PRODUCT

Introduction:

Gross State Domestic Product (GSDP) which is common parlance known as “State Income”, is a measure in monetary terms of sum total volume of all goods and services produced during a given period of time within the geographical boundaries of the State, accounted without duplication. This is one of the most important commonly used single economic indicators to measure the growth and to study the structural change taking place in the economy.

GSDP estimates over a period of time reveal the extent and direction of changes in the level of economic development of the state economy. Sectorial composition of SDP gives an idea of the relative position of different sectors in the economy over a period of time which not only indicate the real structural changes taking place in the economy but also facilitates formulation of plans for overall economic development. These estimates, when studied in relation to the total population of the state, indicate the level of per capita net output of goods and services available or the standard of living of the people in the state and are referred as estimates of the Per Capita Income (PCI).

Estimates of Gross Domestic Product (GDP) are compiled by the National Statistical Office (NSO), Ministry of Statistics and Programme Implementation (MoSPI), Government of India (GoI) at the national level. These estimates are compiled at both current & constant (2011-12) prices. The GSDP estimates are compiled by Directorate of Economics and Statistics (DE&S) following the methodology & guidelines laid down by the NSO, MoSPI.

GSDP at Current Prices:

The Gross Value Added from all economic activities of the economy measured at prevailing prices during the current year is called GSDP at Current Prices. These data are used to estimate Per Capita Income, contribution of sectoral income to the economy and as a denominator to estimate performance indicators such as fiscal/revenue deficit, expenditures on health, education, etc. The current price GSDP data also play a significant role in the devolution of central funds, fixing borrowing limits, etc.

GSDP at Constant (2011-12) Prices:

The Gross Value Added from all economic activities of the economy measured at a base year price is called GSDP at Constant Prices. The growth of the economy in real terms is assessed at Constant Prices. At present the Base year is 2011-12. These estimates eliminate the price effect and present the growth of economy in volume terms. Growth rates of GSDP are widely used to assess the performance of economy in real terms, as also for comparison with other states and the total economy of the country.

Division of Economy into Sectors

In order to estimate the domestic product, the economy is broadly divided into three sectors viz.,

I (Gol)	II (State)
I Primary Sector	I Agriculture Sector
1. Crops (Agriculture+ Horticulture) 2. Livestock 3. Forestry & Logging 4. Fishing & Aqua Culture 5. Mining & Quarrying	1. Crops (Agriculture+ Horticulture) 2. Livestock 3. Forestry & Logging 4. Fishing & Aqua Culture
II Secondary Sector	II Industry Sector
6. Manufacturing 7. Electricity, Gas, water Supply and Remediation Services 8. Construction	5. Mining & Quarrying 6. Manufacturing 7. Electricity, Gas, water Supply and Remediation Services 8. Construction
III Tertiary Sector	III Service Sector
9. Trade, repair, Hotels & Restaurants 10. Railways 11. Transport by Other Means & Storage i. Road Transport ii. Water Transport iii. Air Transport iv. Service incidental to Transport v. Storage 12. Communications & Services related to broadcasting 13. Financial Services (Banking & Insurance) 14. Real Estate, Ownership of Dwellings & professional Services 15. Public Administration 16. Other Services	9. Trade, repair, Hotels & Restaurants 10. Railways 11. Transport by Other Means & Storage i. Road Transport ii. Water Transport iii. Air Transport iv. Service incidental to Transport v. Storage 12. Communications & Services related to broadcasting 13. Financial Services (Banking & Insurance) 14. Real Estate, Ownership of Dwellings & professional Services 15. Public Administration 16. Other Services

Approaches to estimate GSDP:

The concepts & methodology for compilation of GDP/GSDP estimation by NSO, MoSPI, Gol is based on the System of National Accounts (SNA), 2008, which was prepared under the auspices of the Inter Secretariat Working Group on National Accounts comprising of the European Communities (EUROSTAT), International Monetary Fund (IMF), Organisation for Economic Cooperation and Development (OECD), United Nations and the World Bank.

There are three approaches for estimation of Gross State Domestic Product at state level viz.,

1. Production Approach
2. Income Approach
3. Expenditure Approach.

Depending upon the data availability, different approaches are adopted for different sectors and sub sectors.

1. Production (or) Value Added Approach:

Under this approach, value of all goods and services produced within the state are taken without duplication. The Gross Value Added is arrived while deducting the input cost from the total value of output. The method of compiling is as follows.

$$\text{GVA} = \text{GVO} - \text{Material inputs / Intermediate Consumption}$$
$$(\text{GVO} = \text{Production in quantities} \times \text{Price})$$

2. Income approach:

The second approach for estimation of Gross Value Added is income approach by taking the factors which generate the income within the geographical boundaries of the State. Therefore, the State Income is equal to all variables that comprise the total income generated. The procedure for estimation of GVA under this approach is as follows:

$$\text{Salaries \& wages} + \text{Rent} + \text{Interest} + \text{Profit}$$

OR

$$\text{GVA} = \text{Compensation of employees} + \text{Operating Surplus (OS) / Mixed Income (MI)} + \text{Consumption of Fixed Capital (CFC)} + \text{taxes minus subsidies on Production}$$

Railways, Communication and Financial Services sectors are called as supra regional sectors. Its area of economic operation is not co-terminous with the administrative / geographical boundaries of the state. As such these sectors value added is estimated by the National Statistical Office (NSO), MoSPI, Gol and apportioned to the states based on certain physical indicators.

3. Expenditure Approach:

In this method, expenditures made in the economy on final consumption and investment and exports net of imports is estimated to be the domestic product. This method is

followed mainly due to lack of reliable data on production or income. Construction sector estimates are made using this approach.

Total output = Total Expenditure = intermediate consumption + private final consumption expenditure + government final consumption expenditure + gross fixed capital formation + change in stocks + exports – imports.

Gross value added = total output – intermediate consumption

With the above three approaches, sector-wise Gross Value added (GVA) is compiled. To get Net Value Added (NVA) which is indicative of net operation of the economy during the year, Consumption of Fixed Capital (CFC) in other words depreciation is deducted. It is mandatory to keep some allowances aside to replenish the machinery and equipment used on later date in the operation of the economy.

Economic Indicators:

GSDP = Σ GVA at basic prices + Product taxes - Product subsidies

NSDP = GSDP – CFC (Consumption of Fixed Capital)

Per Capita Income (PCI) = NSDP/Population

Periodicity of Estimates:

National Statistical Office (NSO), Ministry of Statistics and Programme Implementation, (MoSPI), GoI issued guideline on revision of nomenclature of GDP/GSDP estimates. The same is adopted at the state level and the details are presented here under.

Estimates	Dates of Release by NSO, GOI	Date of Release in A.P.	Period	Example for Financial Year 2024-25
1 st Advance Estimates (FAE)	7 th January			
2 nd Advance Estimates (SAE)	28 th February	7 th March	1 Month before the completion of the current financial year	28.02.2025
Provisional Estimates (PE)	31 st May			
First Revised Estimates (FRE)	28 th February	7 th March	11 Months after the completion of the financial year	28.02.2026
Second Revised Estimates (SRE)	28 th February	7 th March	23 Months after the completion of the financial year	28.02.2027
Third Revised Estimates (TRE) (Final Estimates)		7 th March	35 Months after the completion of the financial year (after reconciliation with NSO, GOI)	28.02.2028

METHODOLOGY FOR PREPARATION OF SDP ESTIMATES

1. AGRICULTURE:

Estimates of GVA of this activity are prepared by following the production method. Value of output for different crops in Agriculture and Horticulture is worked out by multiplying production with corresponding producer's prices. In case of Miscellaneous and unspecified crops for which production and price data are not available, the value of output is worked out by multiplying the area by the value per hectare of similar crops. Area, Production & Prices data are provided by DES & In case of horticulture crops, Horticulture Department provides the area & Production data.

2. LIVESTOCK:

The Livestock sector for the purpose of estimation of value of output is divided into 7 broad groups. The groups are (i) Milk, (ii) Meat, (iii) Eggs, (iv) Wool, (v) Dung, (vi) Silk Worm, Cocoons and Honey and (vii) Increment in stock. Evaluation of Livestock production is done by multiplying the quantities of production by the corresponding produce's prices. Animal Husbandry Department provides the Production details & Prices data is provided by DES.

3. FORESTRY & LOGGING:

The forest products are classified into two broad categories viz., (a) major products comprising industrial wood (timber, round wood, match and pulpwood) & fuel wood (firewood and charcoal wood) and (b) minor products.

Estimates of GVA are prepared by following the production method. Gross value of output is estimated separately for (a) Industrial wood, (b) Trees outside Forest (ToF), (c) Fuel wood and (d) Minor forest products and (e) Fodder. Estimates of industrial wood/minor forest products are based on recorded production and its prices provided by Forest Department. Estimation of fodder is 21.73% of consumption of Green and Dry fodder value. The value of fuel wood, from the consumption side, is estimated using the latest results of NSSO on consumption expenditure surveys during the previous two quinquennial rounds (used 68th round).

4. FISHING & Aquaculture:

Estimates of GVA of this activity are prepared by following the production approach. GVO is estimated by multiplying the production with prices of inland, marine and prawns/shrimps. Fisheries Department provides the Production & Prices data.

5. MINING & QUARRYING:

The GVA of Major minerals is computed from the annual financial statements of the companies for non-departmental enterprise and private corporate enterprises available from MCA21 database. In case of minor minerals, the GVO is arrived by multiplying the Production with Prices and GVA is arrived by deducting the value of corresponding input rates from Value of output of each mineral, which is provided by Indian Bureau of Mines (IBM), Nagpur. Mines & Geology Department provides minor minerals Production & value.

6. MANUFACTURING:

The manufacturing sector is classified into Public Sector, Private corporate sector and Un- Unincorporated sector.

- ♦ **Public sector:** The estimates of GVA for this segment are obtained through Budget documents and annual reports/accounts for NDEs.
- ♦ **Private corporate sector:** Private corporate estimates are compiled using Annual Survey of Industries (ASI) and MCA21 data base supplied by NSO.
- ♦ **Unincorporated sector:** Benchmark estimates of GVA for the year 2011-12 = effective value added per worker (VAPW) * number of effective workers. The benchmark compilation category-wise estimates are moved to subsequent years using the ASI growth of combined type of organisation codes 1&2.

7. ELECTRICITY, GAS, WATER SUPPLY & REMEDIATION SERVICES:

Electricity: The GVA estimates in this sub-sector are prepared using the production method. The estimates are based on the annual accounts of State Power Generation, Transmission and Distribution Companies, MCA21 database for the Private Sector Companies and other electricity undertakings located in the State. The value added estimates of central undertakings, viz. National Thermal Power Corporation, National Hydro Power Corporation and Power Grid Corporation made available by the NSO are also added.

Gas: Estimates are arrived through analysis of Annual accounts of NDEs for public part and MCA 21 database for Private sector.

Water Supply: The estimates are culled out from the Budget documents and Local Bodies for public sector & MCA 21 Data base for Private corporate. In case of Unincorporated sector for the base year, the estimate of GVA is calculated as Wage per day * Number of working days and allocated to the States on the basis of State-wise annual wages in the activity as per NSS 68th Round and for the subsequent years, the growth rate of GVA at current prices of Private Corporate Sector at the national level in this category is used and allocated according to the base year proportions.

Remediation and other utility services:

The estimates for this sector are compiled by aggregating the estimates for recycling, remediation, sewerage and other waste management services. The estimates for recycling in the organised sector are obtained from ASI, while for the remaining services is estimated by aggregating the estimates of Local Bodies and Enterprises of the Private Corporate Sector. The estimates of unincorporated sectors are compiled using the effective labour input based on the NSSO surveys

8. CONSTRUCTION:

(A) Public Sector:

State Government Administration and Local Bodies estimates are taken from the state budget documents. In respect of Central Administration, the data is supplied by the NSO. GVA estimate of NDEs are obtained by analyzing the Central and States annual reports of NDEs.

(B) Household Sector:

I. Rural Residential Buildings (RRB), Urban Residential Buildings (URB)

and Non- Residential Buildings and Other Construction Works (NRB&OCW):

All India Debt and Investment Survey (AIDIS-NSS 70th round-2013) results are used for compilation of base year (2011-12) estimates of output of RRB, URB and NRB & OCW. These estimates are moved to subsequent years with inter-census growth rate of rural and urban census dwellings based on 2001 and 2011 Population Census data & Index of cost of construction for RRB & URB and weighted index of value of output from 'Agriculture' and 'Manufacturing' are used for NRB & OCW.

II. Other Households:

Other Household sector is a residual estimate of Household sector, which consists of Non Profit Institutions Serving Households (NPISH) and other areas of Household sector, which are not covered, due to non-availability of reliable data sources. State-wise GVA estimate of Other Household is compiled by allocating the All India estimate of Other Household among States using a composite weighted indicator, which is prepared on the basis of State-wise consumption of Cement and Iron & Steel using certain weights.

(C) Residual:

Residual estimate mainly consists of Private Corporations and other residual part of public sector. All India Residual estimate is allocated among States, using composite weighted indicator, used for allocation of All India estimate of "Other Households".

9. TRADES, REPAIR SERVICES, HOTEL & RESTAURANTS:

Trade activity includes wholesale and retail trade in all commodities whether produced domestically, imported or exported and Repair services of computers, household goods and motor vehicles.

- ◆ **Public Sector:** The estimates of GVA for public part in the state governments are prepared on the basis of the budget documents of state and annual accounts of NDEs. Whereas the part relating to Central NDE are prepared and supplied by the NSO.
- ◆ **Private corporate sector:** Estimates of this part are derived using the MCA 21 database.
- ◆ **Unincorporated sector** :Base year state wise GVA estimates have been compiled using GVA from NSS 67th Round and Effective Labour input from NSS 68th Round. The benchmark estimates are moved to subsequent years using the index of sales tax for Trade and No. of Tourists for Hotels and Restaurants.

10. TRANSPORT:

The economic activities covered in this sector are (i) transport by railways, (ii) transport other than Railways, namely, Road transport, water transport, air transport and services incidental to transport, (iii) storage

i. Railways:

Estimates of GVA for railways are considered as part of supra-regional sectors and estimates for this sector is provided by the NSO.

ii. Transport by other means:

The economic activities covered in this sector are: (a) Road transport; (b) Air transport; (c) Water transport; and (d) Services incidental to transport.

a. Road Transport:

- ◆ **Public sector** : The estimates of GVA for this segment are obtained through budget documents and annual reports/ accounts for NDEs.
- ◆ **Private corporate sector** : Private corporate estimates are compiled using MCA21 database.
- ◆ **Unincorporated sector** : Base year state wise GVA estimates have been compiled using GVA from NSS 67th Round and Labour input from NSS 68th Round. For subsequent years, these estimates are moved using growth in registered vehicles.

b. Water Transport & c. Air Transport:

The estimates of this segment are obtained through annual reports/accounts for NDEs for Public part and MCA21 database for Private corporate. The GVA for this part is provided by the NSO.

d. Service Incidental to Transport:

- Public Part:** The estimates of GVA for the segment are obtained through Budget Documents for Departmental Enterprises and Annual Reports/accounts for Non Departmental Enterprises.

- Private Corporate:** Private Corporate estimates are compiled using MCA 21 Data base.
- Unincorporated Sector:** Base year state-wise GVA estimates have been compiled using GVA from NSS 67th Round and labour input from NSS 68th round. For subsequent years, combined growth of (Road + water) transport at Current Prices used to extrapolate the base year estimates.

iii. Storage:

The estimates in respect of public warehousing are based on the annual accounts of warehousing corporation and Private corporate estimates are compiled using MCA21 database.

11. Communication and services relating to broadcasting:

Activities covered in this sector are Courier, Cable operators, Telecommunication and Recording, Publishing & Broadcasting services.

- ◆ **Public** : Estimates of GVA communications are considered as part of supra-regional sectors and estimates for these sectors are provided by the NSO.
- ◆ **Private corporate sector** : Private Corporate estimates are prepared using MCA21 database.
- ◆ **Unincorporated sector** : Base year GVA as compiled using GVA from NSS 67th Round and Labour input from NSS 68th Round has been allocated on the same criteria as used in the private corporate sector.

12. Financial Services (Banking & Insurance, Pensions and Other Financial Services):

This sector is part of a supra-regional sector and estimates of GVA are provided by the NSO.

13. Real Estate, Professional Services & Ownership of Dwellings:

The economic activities covered in this sector are (1) Real Estate and Professional Services, which comprises of (a) Real estate activities; (b) Computer & information related services; (c) Professional, scientific and technical activities including R&D; and (d) Administrative and support service activities and other professional activities and (2) Ownership of dwellings (occupied residential houses Urban & Rural).

- ◆ **Public Sector:** The estimates of GVA for public part in the state governments are prepared on the basis of the budget documents of state and annual accounts of NDEs. Whereas the part relating to Central NDE are prepared and supplied by the NSO.
- ◆ **Private corporate sector:** Estimates of this part are derived using the MCA 21 database.
- ◆ **Unincorporated sector** : Base year state wise GVA estimates have been compiled using GVA from NSS 67th Round and Effective Labour input from NSS 68th Round.

Ownership of Dwellings:

GVA estimates for the ownership of dwellings are estimated as the gross rental of the residential census houses less the cost of repairs and maintenance. The GVA estimates of urban dwellings; the data on dwellings and rent per dwelling for urban areas is taken from the latest Population Census and NSS on consumer expenditure respectively. For subsequent years, estimates of census residential houses are prepared using the intercensal growth rate and the rent per household is moved to subsequent years with the index of house rent sub-group in the CPI (U). The GVA of rural part of ownership of dwelling by using user cost approach, which is supplied to states by NSO.

14. Public Administration:

Gross Value Added (GVA) is estimated by the “Income Approach”. The Salaries, Wages & Pensions (except Education & Health as these 2 are included in Other Services) is taken from the State budget, local body & Autonomous. The estimates of value added in respect of Central Government Administration are prepared and supplied by the NSO. These are added to the estimates of Central Government Administration to obtain the estimates of public administration.

15. Other Services:

The economic activities covered under this sector are (i) Education services; (ii) Human Health & care services; (iii) recreation, cultural and sporting activities; (iv) Activities of membership organisations; (v) Personal services including washing, hairdressing, custom tailoring and other personal service activities; and (vii) Private households with employed persons.

GVA Estimates of Public part are arrived using the Salaries, Wages & Pensions of Education & Health as per State Budget Documents, Annual Accounts of Local Bodies and Annual Accounts of Autonomous Institutions and Central Admn. data, which is provided by NSO. For Private Corporate, estimates are compiled using MCA21 data. In case of Un-incorporated sector, Base year GVA has been allocated on the basis of GVA from NSS 67th Round and Labour input from NSS 68th Round. For subsequent years previous year's estimates are moved using inter survey growth.

- ◆ Most of the service sector data will not be available at the time of preparation of Advance Estimates. These sectors GVA is arrived based on suitable respective physical indicators till the analysis of annual accounts of Central NDEs, Private Corporate Companies (MCA-21 data base) & Un-incorporated sector are received from the NSO, MoSPI, Gol.
- ◆ NSO, MoSPI, Gol provides Inputs, FISIM and CFC for each Sector.
- ◆ DE&S, A.P. methodology follows the guidelines & Methodology of NAD, NSO, MoSPI in the preparation of GSDP/DDP estimates.

For more details visit MoSPI, Govt. of India website i.e <https://www.mospi.gov.in>

DISTRICT DOMESTIC PRODUCT OF ANDHRA PRADESH

Introduction

The importance of grass root level planning at district or sub region level is increasing day by day and for decentralized planning, it is very essential to have proper data on various development indicators. Among them, estimates of District Domestic Product (DDP) or District Income are one of the core indicators. Preparation of District level estimates has gained importance over the years to achieve balanced regional development.

The district per capita income estimates help the planners to compare the inter district variations, which helps to examine the district disparities and prepare proper plans for the development of the districts. With the gradual improvement in the availability of basic data over the years, a comprehensive review of methodology for district income has constantly been undertaken with a view to update the data base and shift the base year to a more recent year.

The state of Andhra Pradesh is a fore runner in the preparation of District Domestic Product as per the National Statistical Office (NSO) guidelines. The Estimates provide information on the economic status of the districts in a state and the performance of different sectors across the regions in the State.

The analysis of District Domestic Product Estimates and Inter district sectoral comparison help to identify the Economic scenario of the districts, development status of the districts and at the same time enable the Government to identify the potential areas across the state for Policy making and Investment promotion in an appropriate manner.

Comparison of time series estimates of District income enable to know the sector wise trends of development on different regions and also the structural changes in the economy taking place across the districts. This will help the Governments to take initiatives/ interventions where ever required.

METHODOLOGY FOR COMPILING DISTRICT DOMESTIC PRODUCT (DDP)

The availability of district-wise basic data for estimation of income at the district level is fairly available in respect of Agriculture & Allied sectors and Mining & Quarrying sectors, but it is very scanty in respect of other sectors. As such, wherever the basic data is available, the methodology used at the state level is followed for estimation of district Income. In other cases, depending upon the availability of data, relevant physical indicators are utilized to allocate the state level estimates to the districts. Sector wise estimation procedure is as follows.

1. AGRICULTURE (Agriculture + Horticulture):

District-wise value of output for major crops is worked out by using district-wise production and prices. Crops for which though district-wise production is available, corresponding district-wise prices are not available, for this category of crops district-wise value of output are computed by using district-wise production and regional/ neighbouring districts, prices if available. In case of non availability, the state level prices are adopted.

Miscellaneous and unspecified crops for which production and price data are not available even at the state level but district-wise area is available; in such cases the value of out-put are worked out by multiplying the district-wise area by the state level value per hectare (VPH) of similar crops.

2. LIVE STOCK:

Milk/Meat/ Wool/ Cocoons/ Honey:

The district-wise Milk/Meat/wool/ Cocoons/Honey production is multiplied with the average whole sale prices to obtain the value of Milk/Meat/wool/ Cocoons/ Honey for each district.

Meat by Products:

The district wise estimates of Meat by-products value is arrived by allocating the State GVO of meat by products on the basis of district wise meat production.

Dung:

The district wise dung value is arrived by allocating the State GVO of dung on the basis of district wise Bovine, sheep & goat population.

Egg:

The State GVO of Eggs is allocated to the districts on the basis of egg Production.

Poultry Meat:

The district wise Poultry meat value is arrived by allocating the State GVO on the basis of district wise Poultry Population.

Increment in livestock: The State Increment in livestock GVO is allocated to the districts on the basis of District wise Population of Livestock.

3.FORESTRY & LOGGING

Major /Minor forests produce:

State GVA of Major forest produce and minor forest produce is apportioned among the Districts based on District wise Forest area.

Trees Outside Forest (TOF):

State GVA of TOF is apportioned among the Districts on the basis of Area under District wise Forest area.

Fuel wood:

State GVA of Fuel wood is apportioned among the Districts on the basis of Rural and Urban population.

Fodder:

The state GVA of Fodder is allocated among the Districts based on Livestock projected population, based on 2019 Census.

4. FISHING

District-wise value of Inland fish/Marine fish/Prawns is estimated by multiplying the district-wise production with corresponding prices.

5. MINING AND QUARRYING

The state GVA is allocated to the districts on the basis of district-wise production of major and minor minerals.

6. MANUFACTURING

1.Organised (Publi+Pvt.Corp): State GVA is allocated to districts on the basis of district wise ASI GVA provided by NSO, Kolkata and NDEs based on location.

2. Un-organised(Un-incorporate): State GVA is allocated to districts on the basis of district wise ASI non-corporate GVA provided by ASI, NSO, Kolkata.(Code 1 & 2)

7. ELECTRICITY, GAS, WATER SUPPLY AND & OTHER UTILITY SERVICES (REMEDIATION)

i.Electricity: The state GVA is allocated to the districts by using the following indicators

- a. Generation: District wise Plant location and it's Generated Capacity
- b. Transmission & Distribution: District wise power consumption of Electricity

ii. Gas:

- a. NDE Gas: Based on district wise production of Natural gas.
- b. Bio-Gas: District wise No. of Bio Gas Plants.

iii. Water Supply: District wise GVA of Water supply in Local Bodies Accounts

iv. Remediation & Other Utility Services: District wise GVA of Sanitary services in Local Bodies Accounts

8. CONSTRUCTION

The state GVA is allocated to the districts by using the following indicators

Households

- a. Rural Residential Buildings (RRBs) : Rural Households (2011)
- b. Urban Residential Buildings (URBs): Urban Households (2011)
- c. Non-Residential Buildings & Other-: Urban Households (2011)
- Construction Works
- d. Plantation : Area of plantation in Agriculture
- e. Other Households : Urban Households (2011)

Public Sector

- a. Central Govt.Admin.
 - b. State Govt.admin.&
Local body GVA
 - c. State & Central DCUs
Except Railways
 - d. NDEs
 - e. Railways : Length of Railway Line
- } Local Body GVA

Residual

:Urban Households (2011)

9. TRADE, HOTELS AND RESTAURANTS

The state GVA is allocated to the districts by using the following indicators

Trade

- a. Public: District wise paddy procured from civil supplies department
 - b. Pvt. Corporate:&
 - c. Un-incorporated:
- } District wise total Tax Revenue collections

Hotels and Restaurants

- a. Public:
 - b. Pvt. Corporate:&
 - c. Un-incorporated:
- } District wise no. of Tourists (Domestic & Foreign)

10. RAILWAYS

The District estimates for Railways is compiled duly apportion the state GVA by using the indicator of district wise no. of Employees which is taken from DE& SO.

11. TRANSPORT BY OTHER MEANS AND STORAGE

The state GVA is allocated to the districts by using the following indicators

Road Transport:

- a. Public: District wise No of employees in APSRTC
 - b. Pvt. Corporate: &
 - c. Un-incorporated:
- } District wise No. of Vehicles Registered data

Water Transport:

- a. Public:
 - b. Pvt. Corporate: &
 - c. Un-incorporated:
- } Cargo Handled at Ports (Location Based)

Air Transport:

- a. Public:
 - b. Pvt. Corporate:
- } Passenger Air Traffic (Location Based)

Services to incidental Transport:

- a. Public: Based on NDE's Location
- b. Pvt. Corporate: Combined Growth of Road, water & Air transport
- c. Un-incorporated: Combined Growth of Road & water transport

Storage:

- a. Public: District wise Warehousing storage capacity in MTs
- b. Pvt. Corporate: District wise Cold Storage capacity in MTs

12. COMMUNICATION & SERVICES RELATED TO BROADCASTING

The District estimates for Communications is compiled duly apportion the state GVA by using the indicator of district wise Urban Households (as per 2011 census).

13. BANKING & INSURANCE

The District estimates for Banking & Insurance is compiled duly apportion the state GVA by using the indicator of district wise Bank Credits & Deposits.

14. REAL ESTATE & OWNERSHIP OF DWELLINGS

The State Real Estate GVA is allocated among the districts for

public part: No. of non-agricultural enterprises-6th Economic Census

Private - Corporate Part:

a. Real Estate + Renting: Real Estate workforce (6th Economic census).

b. Computer and R&D: Professional, Scientific & Technical Activities as per 6th Economic census.

Un-incorporate Part – Rent + Admin: Real Estate work force (6th Economic census).

Ownership of Dwellings:

a. Urban: Urban Households 2011 Census.

b. Rural: Rural Households 2011 Census.

15. PUBLIC ADMINISTRATION

a. Central, State Govt.: District wise No. of Employees working in all Departments & Local Bodies in the state. (Director, O/o Treasuries & Accounts).

b. Autonomous Institutions: District wise GVA of Autonomous Institution Accounts (DE&S).

16. OTHER SERVICES

The district GVA estimates for other services sector duly apportion the state GVA by using the following indicators

Education

Public

a. Central & State Government: District wise no. of Employees

b. Local Bodies : District wise GVA of Local Body Accounts

c. Autonomous: Institutions : District wise GVA of Autonomous Institution Accounts

Pvt. Corporate & Un-incorporate : District wise no. of employees working in Private sector

Health

Public

a. Central & State Government : District wise no. of Employees

b. Local Bodies : District wise GVA of Local Body Accounts

c. Autonomous: Institutions : District wise GVA of Autonomous Institution Accounts

Pvt. Corporate & Un-incorporate : District wise no. of employees working in private sector.

Remaining Other Services : District wise Urban Population 2011 Census

- ❖ The State level Value of Inputs is allocated to district in proportion to the GVO of each district. By deducting the Value of Inputs from GVO, we arrive unadjusted GVA for each district.
- ❖ The State level FISIM is allocated to district in proportion to the unadjusted GVA of each district. By deducting the FISIM from unadjusted GVA, we arrive at GVA at basic prices for each district
- ❖ The State level CFC is allocated to the district in proportion to the district wise GVA.

Limitations

Apart from the Agriculture and Mining & Quarrying sectors the availability of District level data in respect of other sectors is not adequate. Attempts are being made continuously to improve the District level data base, still a wide gap remains to be filled up. To overcome the data gaps for certain sectors at district level appropriate Proxy indicators adopted to apportion the state income among the districts. As such it gives a broad indication about that sector in the district. Moreover, in most of the cases the data is available only after a considerable lapse of time. Hence, the estimates presented here are based on the data available at the time of computation of the estimates. As a result, these estimates for the latest years are purely provisional and will be revised as and when more reliable and firm data is available.

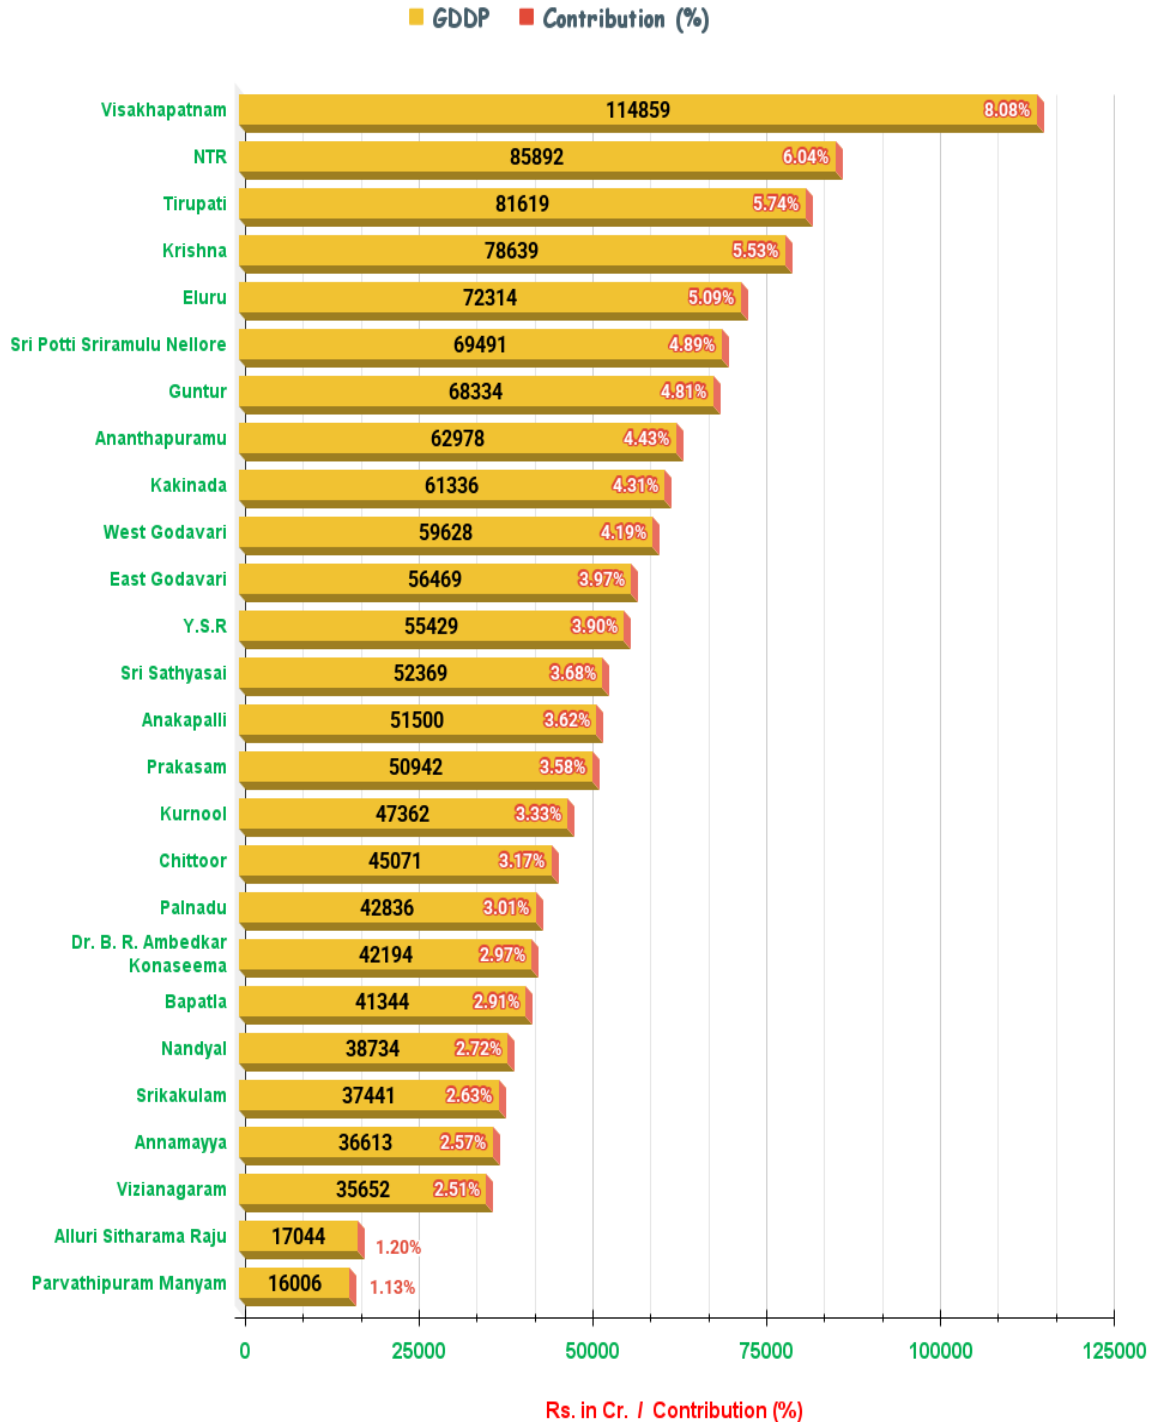

Highlights in Gross District Domestic Product -2023-24 (FRE) At Current Prices

- Visakhapatnam is leading among all the districts in DDP (Rs.1,14,859 Cr.) followed by NTR (DDP: Rs.85,892 Cr.).
- Parvathipuram Manyam is the lowest DDP (Rs.16,006 Cr.) in the state followed by Alluri Sitharama Raju (Rs.17,044 Cr.) and Vizianagaram (Rs.35,652 Cr.).
- Srikakulam is the least Per Capita Income (Rs.1,42,244) district followed by Parvathipuram Manyam (Rs.1,48,645) and Vizianagaram (Rs.1,54,023).
- Out of 26 districts 9 districts have more than the State Per Capita Income. Viz., Visakhapatnam (Rs.4,57,688), Krishna (Rs.3,85,459) , NTR (Rs.3,21,651), Eluru (Rs.3,10,460), Tirupathi (Rs.2,93,074), West Godavari (Rs.2,73,383), Guntur (Rs.2,69,825), East Godavari (Rs.2,59,570) and Kakinada (Rs.2,42,813).
- In Agriculture & Allied Sector, Eluru district ranked first with 9.77% contribution in AP Agriculture & Allied Sector GVA followed by Krishna with 7.95 percent and West Godavari with 5.90%.
- In 3 districts Agriculture & Allied GVA contributed more than 50% of the districts total GVA. Viz., Eluru (65.50%), Alluri Sitharama Raju (62.04%) and Bapatla (58.36%).
- Visakhapatnam ranked first with 15.07% contribution in AP Industrial Sector GVA followed by Tirupathi with 10.66 percent & Anakapalli with 7.25 percent In Industrial Sector.
- In Services Sector, NTR ranked first with 9.65% contribution in AP Services Sector GVA followed by Visakhapatnam with 9.64 percent & Guntur with 6.60 percent.
- The share of Service sector is more than 50% to the total District GVA which is noticed in NTR (66.44%) , Guntur(57.14%), Srikakulam(51.98%) and Vijayanagaram(50.75%).
