PREFACE

The Directorate of Economics & Statistics, Madhya Pradesh prepares estimates of State Domestic Product every year according to methodology prescribed and disseminated by National Statistical Office Government of India, New Delhi. The publication contains estimates of State Domestic Product by broad industry groups from 2011-12 to 2022-23 both at current and constant prices with new base year 2011-12. Overview of the State's economy is given in **part-one** and the tabular information of State Domestic Product in **part-two** of this publication.

I am especially grateful to National Accounts Division of Central Statistical Office, New Delhi for providing valuable guidance and continuous support. I also thank various Central Ministries and Departments of the State Government for their co-operation and timely response in providing the voluminous information for compiling the estimates.

The publication is prepared by State Income Division of the Directorate. I place on record my appreciation of the sincere efforts and labour put in by the officers and staff of the State Income Division.

Suggestions for improving the contents of the publication are welcome.

भाग 1 संक्षिप्त विश्लेषण
Part 1 Overview

संक्षिप्त विश्लेषण

प्रस्तावना

राज्य की अर्थव्यवस्था के उद्योग-समूहवार विश्लेषण में क्षेत्रीय लेखा सांख्यिकी की महत्वपूर्ण भूमिका है। राज्य के समाजार्थिक क्षेत्र की अर्थव्यवस्था एवं विकास के स्तर के मूल्यांकन के लिए राज्य घरेलू उत्पाद के अनुमान ही एक महत्वपूर्ण संकेतक है, साथ ही यह सुदृढ़ अर्थव्यवस्था के नियंत्रण एवं विकासात्मक योजनाओं के क्रियान्वयन के लिए ठोस आधार है। राज्य की अर्थव्यवस्था का पूर्ण एवं सापेक्ष निष्पादन प्रति व्यक्ति आय के आधार पर किया जाता है।

संयुक्त राष्ट्र संगठन के सांख्यिकी कार्यालय द्वारा विकासशील देशों के लिये प्रस्तावित **राष्ट्रीय लेखा पद्धति** के अनुरूप केन्द्रीय सांख्यिकी कार्यालय, भारत सरकार द्वारा अपनाये जा रहे राष्ट्रीय लेखा सांख्यिकी के सिद्धांतों एवं कार्यपद्धति के अनुरूप राज्य घरेलू उत्पाद के अनुमान तैयार किये जाते हैं। इस प्रकार ये अनुमान राज्य शासन, राष्ट्रीय योजना आयोग, वित्त आयोग एवं अन्य संगठनों को तुलनात्मक अध्ययन, आर्थिक कार्यकलापों के मध्य संतुलित वित्त प्रवाह एवं समुचित विकास के उद्देश्य से भावी योजनाओं के लिये उपलब्ध होते हैं।

संचालनालय द्वारा प्रति वर्ष पूर्व वर्ष के मार्च माह में समाप्त होने वाले वित्तीय वर्ष के लिये राज्य घरेलू उत्पाद के त्वरित अनुमान कृषि उत्पाद, औद्योगिक उत्पादन सरकारी व्यय एवं अन्य नवीनतम/आंशिक आँकड़ों के आधार पर तैयार किये जाते हैं। पूर्व वित्तीय वर्ष के त्वरित अनुमानों के साथ ही विभिन्न स्त्रों/अभिकरणों से उपलब्ध विस्तृत और अद्यतन आँकड़ों को प्रयुक्त करते हुए कुछ पूर्व वित्तीय वर्षों के अनुमानों को पुनरीक्षित भी किया जाता है।

पूर्व वित्तीय वर्ष के लिये त्वरित अनुमानों के अलावा चालू वित्तीय वर्ष के लिये घरेलू उत्पाद के अग्रिम अनुमान भी तैयार किये जाते हैं जो कृषि फसलों के पूर्वानुमान, कुछ क्षेत्रों के लिये निर्धारित वार्षिक लक्ष्य, राज्य शासन के बजट अनुमानों के विश्लेषण एवं प्रमुख क्षेत्रों के व्यय एवं निष्पादन के आँकड़ों पर आधारित होते हैं।

राज्य विधान सभा में बजट प्रस्ताव के साथ प्रस्तुत प्रकाशन **“मध्यप्रदेश का आर्थिक सर्वेक्षण”** में भी राज्य घरेलू उत्पाद के अनुमान सारांश में दिये जाते हैं।

इस अंक में वर्ष 2011-12 से वर्ष 2022-23 तक के लिए राज्य घरेलू उत्पाद के अनुमान प्रचलित एवं स्थिर (2011-12) भावों पर प्रस्तुत किये गये हैं। वर्ष 2020-21 के लिये प्रावधिक, वर्ष 2021-22 के त्वरित तथा वर्ष 2022-23 के अग्रिम अनुमान तैयार किये गये हैं।

OVERVIEW

INTRODUCTION

Regional Accounts Statistics play an important role in industry-group wise analysis of the State's economy. The estimates of State Domestic Product are important and reliable indicator to measure overall growth of the economy as well as the level of development in various socio-economic sectors. These estimates provide a solid base for formulation of development programmes and to pursue a sound economic policy. The Per Capita Income is use to determine both absolute and relative performance of the economy of the State.

The Estimates of State Domestic Product are prepared according to methodology and principles adopted by the Central Statistical Organisation, Government of India under the "National Accounts Statistics", which in turn is based on the **System of National Accounts**, suggested by the Statistical Office of the United Nations for Developing Countries. In this way these estimates are available to State Government, Planning Commission, Finance Commission and other Organisations for comparative study, to regulate the fund flow among the economic activities and for better developmental planning.

The Directorate prepares every year Quick estimates of State Domestic Product for the financial year ending March of the preceding year. These estimates are based on the latest available data on agricultural production, industrial production, government expenditure and other current/partial data available. The estimates for a few earlier financial years are also revised using the detailed and more comprehensive data available from various sources/agencies.

Beside the Quick estimates for the preceding financial year, the Advance estimates of State Domestic Product for current financial year are also compiled on the basis of forecast level of agricultural crops, targets fixed for certain sectors, analysis of budget estimates of State government and expenditure and performance of key sectors.

Estimates of State Domestic Product are also given in brief in the publication "**Economic Survey of Madhya Pradesh**" presented along with the Budget proposals before the State Legislative Assembly.

This publication presents the estimates of State Domestic Product both at current and constant (2011-12) prices from the year 2011-12 to 2022-23. For the year 2020-21 Provisional, year 2021-22 quick and advance estimates are prepared for the year 2022-23.

1. राज्य की अर्थव्यवस्था

मध्यप्रदेश एवं अखिल भारत के सकल घरेलू उत्पाद, निवल घरेलू उत्पाद एवं प्रति व्यक्ति आय के तुलनात्मक आंकड़े क्रमशः सारणी 1(अ), 1(ब) एवं 1(स) में दिये गये हैं।

सकल राज्य घरेलू उत्पाद

मध्यप्रदेश का सकल राज्य घरेलू उत्पाद 10.43 प्रतिशत की वृद्धि आंकलित करते हुए स्थिर (2011-12) भावों पर वर्ष 2020-21 के रुपये 543935 करोड़ की अपेक्षा वर्ष 2021-22 में रुपये 600689 करोड़ अनुमानित किया गया है, जबकि अग्रिम अनुमानों के आधार पर 7.06 प्रतिशत की वृद्धि के साथ वर्ष 2022-23 में सकल घरेलू उत्पाद 643124 करोड़ रुपये रहने का अनुमान है। प्रचलित भावों पर सकल राज्य घरेलू उत्पाद 18.15 प्रतिशत की वृद्धि दर्शाते हुए वर्ष 2020-21 के रुपये 961643 करोड़ की तुलना में वर्ष 2021-22 में रुपये 1136137 करोड़ अनुमानित किया गया है। वर्ष 2022-23 हेतु आंकलित अग्रिम अनुमानों के अनुसार 16.43 प्रतिशत की वृद्धि के साथ यह 1322821 करोड़ रुपये रहने का अनुमान है। अखिल भारत के सकल देशीय उत्पाद की वृद्धि दर वर्ष 2022-23 में स्थिर भावों (2011-12) पर 7.00 प्रतिशत तथा प्रचलित भावों पर 15.90 प्रतिशत रहने का अनुमान है।

2. ADVANCE ESTIMATES OF STATE INCOME 2022-23

Introduction: The approach for compiling the advance estimates of State Income is broadly based on the bench mark indicators method. The advance estimates at constant prices for the year 2022-23 are based on anticipated level of agricultural and industrial production, analysis of Budget estimates of State Government, expenditure and performance of key sectors of the economy. Estimates at current prices are prepared with the help of Implicit Price Index.

According to advance estimates of State Income the GDP at constant (2011-12) prices is likely to attain a level of Rs. 643124 Crore with a increase of 7.06 percent during the year 2022-23 and at current prices it would be increase to Rs. 1322821 Crore. The increase against previous year is 16.43 percent.

The per capita income during 2022-23 is estimated to be Rs. 65023 at constant (2011-12) prices with a increase of 5.67 percent against previous year and Rs. 140583 at current prices showing a increase of 15.62 percent.

3. AVERAGE ANNUAL GROWTH RATE

Increase/decrease in GSDP/NSDP and Per Capita during each year and simple average of such change for different periods are shown in the **Statement 3(A) to Statement 3(D)**. Increase or decrease in gross/net state domestic product at constant prices indicates the change in economy.

At constant (2011-12) prices, the increase of 10.43 percent in gross state domestic product has been recorded in the year 2021-22 and the increase of 7.06 percent in 2022-23 respectively. During the year 2021-22 net state domestic product would increase by 10.66 percent and would increase by 6.95 percent in 2022-23. The increase of 9.26 percent has been recorded in per capita net state domestic product during the year 2021-22 and it would likely increase by 5.67 percent during 2022-23.

4. सकल राज्य मूल्य वर्धन— वृहत् क्षेत्रवार निष्पादन

सकल राज्य मूल्य वर्धन का वृहत् क्षेत्रवार निष्पादन सारणी 4 में दर्शाया गया है। सकल मूल्य वर्धन में प्राथमिक क्षेत्र का अंश आधार वर्ष में क्रमशः 33.85 प्रतिशत था जो बढ़कर स्थिर (2011-12) भावों पर वर्ष 2022-23 में 36.32 प्रतिशत अनुमानित है, जबकि द्वितीयक क्षेत्र एवं तृतीयक क्षेत्र का अंश आधार वर्ष में 27.09 प्रतिशत एवं 39.06 प्रतिशत था जो घटकर वर्ष 2022-23 में 25.38 प्रतिशत एवं 38.30 प्रतिशत होने का अनुमान है।

स्थिर (2011-12) भावों पर वर्ष 2021-22 के त्वरित अनुमान की तुलना में वर्ष 2022-23 में प्राथमिक क्षेत्र के सकल मूल्य वर्धन में 5.24 प्रतिशत की वृद्धि एवं द्वितीयक क्षेत्र तथा तृतीयक क्षेत्रों में क्रमशः 5.42 प्रतिशत एवं 9.99 प्रतिशत की वृद्धि होने की संभावना है।

सकल मूल्य वर्धन में आधार वर्ष की तुलना में वर्ष 2022-23 में प्रचलित भावों पर 308.93 प्रतिशत तथा स्थिर भावों पर 94.85 प्रतिशत वृद्धि का अनुमान है जबकि गत वर्ष की तुलना में प्रचलित भावों पर 16.48 प्रतिशत एवं स्थिर भावों पर 7.06 प्रतिशत वृद्धि की संभावना है।

▨ प्राथमिक क्षेत्र

▤ द्वितीयक क्षेत्र

▩ तृतीयक क्षेत्र

प्राथमिक क्षेत्र में फसलें, पशुधन, वानिकी और लट्ठा बनाना, मत्स्यन एवं जलीय कृषि व खनन और उत्खनन क्षेत्र सम्मिलित है। **द्वितीयक क्षेत्र** में विनिर्माण, बिजली, गैस, जलापूर्ति और अन्य उपयोगी सेवाएं व निर्माण क्षेत्र सम्मिलित है।

तृतीयक क्षेत्र में व्यापार, मरम्मत, होटल और जलपान गृह, परिवहन एवं भंडारण, रेलवे, संचार एवं प्रसारण से संबंधित सेवाएं, वित्तीय सेवाएं, स्थावर संपदा, आवास का स्वामित्व और व्यावसायिक सेवाएं, लोक प्रशासन व अन्य सेवाएं सम्मिलित है।

4. GROSS STATE VALUE ADDED - BROAD SECTOR WISE PERFORMANCE

Broad sector wise performance of Gross state value added is shown in the **Statement 4**. In Base year the share of primary sector in GVA were 33.85 percent, which would increase at constant (2011-12) prices up to 36.32 percent in 2022-23, whereas the share of secondary sector and tertiary sector and are likely to reduce from 27.09 percent and 39.06 percent of base year to 25.38 percent and 38.30 percent respectively in the year 2022-23.

In comparison to Quick Estimates of 2021-22 at constant (2011-12) prices GVA of primary sector would grow by 5.24 percent and secondary and tertiary sector are to grow by 5.42 and 9.99 percent during the year 2022-23.

In the year 2022-23 gross value added would increase by 308.93 percent at current prices and at constant (2011-12) prices it would rise up to 94.85 percent in comparison to base year, whereas in comparison to previous year the gross value added is to grow by 16.48 percent at current prices and 7.06 percent at constant prices.

5. PERFORMANCE OF CROP SECTOR

Value of output of crops and production of major crops are given in the following **Statement 5**. In the year 2021-22 the value of crops product at constant (2011-12) prices increased by 6.14 percent in comparison to previous year.

Under the major crops mainly production of Paddy, Jowar, Maize, Urad, Groundnut, Rape-Mustard and Soyabean show an increase of 5.53, 8.76, 4.00, 97.54, 28.24, 29.38 and 60.00 percent respectively. While production of Wheat, Bajara, Gram, Arhar and Masur are reduced by 2.09, 4.30, 18.36, 33.57 and 5.53 percent during the year 2021-22.

Methodology

GROSS VALUE ADDED AT BASIC PRICES

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
1. Agriculture (Crop Sector)				
(a) Value of output				
(1) Major and minor crops				
(i) Major crops	- Production: Directorate of Economics and Statistics, M/o Agriculture (DESAg) - Prices: State DESs	Value of output = current year production * current year price	Value of output = current year production * base year price	
(ii) Minor Crops	- Production: Horticulture Statistics Division (DAC, M/o Agriculture) & State DESs - Prices: State DESs	Value of output = current year production * current year price	Value of output = current year production * base year price	
(iii) Small Millets	- Production: DESAg - Prices: State DESs	Value of output = current year production * current year price	Value of output = current year production * base year price	Price = 75% of weighted average price of jowar, bajra, barley, maize and ragi in the reference year
(iv) Other Pulses	Production: DESAg and State DESs	Value of output = current year production * current year price	Value of output = current year production * base year price	Price = 85% of weighted average price of arhar, urad, moong, masur and horsegram in reference year
(2) Commercial Crops				
(i) Tea	- Production of processed tea: Tea Board - Prices: State DESs	Value of output = current year production of Raw tea * current year price	Value of output = current year production of Raw tea * base year price	Production of Raw tea = processed tea / 0.225
(ii) Coffee	- Production: Coffee Board - State DESs (prices)	Value of output = current year production * current year price	Value of output = current year production * base year price	

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
(iii) Rubber	- Production: Rubber Board - Prices : State DESs	Value of output = current year production * current year price	Value of output = current year production * base year price	
(iv) Cashew Nuts And Cocoa	- Production: Directorate of Cashewnut and Cocoa Development Board - Prices: State DESs	Value of output = current year production * current year price	Value of output = current year production * base year price	
(v) Horticulture Crops:	- Production: Horticulture Statistics Division (DAC, M/o Agriculture) - Prices: State DESs	Value of output = current year production * current year price	Value of output = current year production * base year price	
(vi) Opium	Production and Prices: Central Bureau of Narcotics	Value of output = current year production * current year price	Value of output = current year production * base year price	
(vii) Arecanut	- Production: Directorate of Arecanut and Spices Development - Prices: State DESs	Value of output = current year production * current year price	Value of output = current year production * base year price	
(viii) Flowers (separately for cut flowers and spike)	- Production: Horticulture Statistics Division (DAC, M/o Agriculture) - Prices: State DESs	Value of output = current year production * current year price	Value of output = current year production * base year price	
(3) Miscellaneous Crops				
(i) Other Cereals	Area: LUS from DES Ag / State DESs	Value of output = area * current year value per hectare (VPH)	Value of output = area * base year value per hectare	Value per hectare = weighted average of value per hectare of the crops: jowar, bajra, barley, maize and ragi in reference year
(ii) Other Sugars (excluding Palmyra)	Area: LUS from DES Ag / State DESs	Value of output = area * current year value per hectare	Value of output = area * base year value per hectare	Value per hectare = 0.90* VPH of the crop sugarcane in reference year

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
(iii) Other Oilseeds (excluding Taramira)	♦ Area: LUS from DES Ag / State DESs	Value of output = area * current year value per hectare	Value of output = area * base year value per hectare	Value per hectare = 0.85 * weighted average of value per hectare of linseed, sesamum, castorseed, nigerseed and safflower in reference year
(iv) Other Fibres	♦ Area: LUS from DES Ag / State DESs	Value of output = area * current year value per hectare	Value of output = area * base year value per hectare	Value per hectare = 0.90* weighted average of value per hectare of sanhep and mesta in reference year
(v) Other Drugs and Narcotics	♦ Area: LUS from DES Ag / State DESs	Value of output = area * current year value per hectare	Value of output = area * base year value per hectare	Value per hectare = 0.90* weighted average of value per hectare of opium (Madhya Pradesh & Rajasthan) and tobacco & tobacco stem (other states) in reference year
(vi) Other Condiments and Spices	♦ Area: LUS from DES Ag / State DESs	Value of output = area * current year value per hectare	Value of output = area * base year value per hectare	Value per hectare = 0.90* weighted average of value per hectare of dry chillies, dry ginger, cardamom and black pepper in reference year.
(vii) Other Fruits	♦ Production: Horticulture Statistics Division (DAC, M/o Agriculture)	Value of output = current year production * current year price	Value of output = current year production * base year price	Price = weighted average price of all fruits for which separate data is available in reference year.
(viii) Other Vegetables	♦ Production: Horticulture Statistics Division (DAC,	Value of output = current year production * current year price	Value of output = current year production * base year price	Price = weighted average price of all vegetable for

Item	Data: Source	Method of estimation		Remarks

(5) Sand	- Results of CBRI Study - Input rates: IBM	- Value of output = 7.21% of value of material inputs in construction, adjusted for TTM - Intermediate consumption and Value Added derived using the input rate obtained from IBM - GVA allocated to States on the basis of value of production of sand received from the States	Constant price estimates are derived using deflators of non-metallic minerals compiled from the IBM data on production, prices and input rates.	1. Growth of GVA-Construction can be used as an indicator to move the previous year's estimates. 2. Deflators of non-metallic minerals can be derived from the IBM publication at the State level also.
7. Manufacturing				
Public corporations: Railway Workshops & Production Units	- Railway Budget Documents - WPI: M/o Commerce and Industry	Estimates of GVA compiled using production approach and allocated to the States on the basis of sanctioned strength of employees in the case of Railway Workshops & state-wise salaries in the case of production units.	Current price estimates are deflated with the relevant WPI.	
Public corporations: Other Departmental Enterprises (DEs)	- Budget Documents of central & state governments - WPI: M/o Commerce and Industry	- Estimates of GVA compiled using production approach. - GVA of central DEs are allocated to the States on the basis of the location of the DE.	Current price estimates are deflated with the relevant WPI.	GVA of State DEs are allocated to the respective States.

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
Public corporations: Non-Departmental Enterprises (NDEs)	♦ Annual Reports of NDEs ♦ State-wise number of employees & value of assets: Public Enterprises Survey of DPE ♦ WPI: M/o Commerce and Industry	♦ Estimates of GVA at current prices are estimated by the production approach and allocated to States in the case of multi-state NDEs. CE is distributed on the basis of the number of employees in each State in proportion to State-wise employment in that NDE, while OS is distributed in proportion to the State-wise gross block (Value of Assets) of that NDE.	Current price estimates are deflated with the relevant WPI.	In the case of single-state NDEs, the entire GVA is allocated to that State/UT.
Private Corporations				
Private Companies	♦ MCA21 database for the annual reports of Private Sector Companies ♦ Annual Survey of Industries (ASI) ♦ WPI: M/o Commerce and Industry	♦ Estimates of GVA are compiled using production for the Private Sector Companies using MCA21 database and allocated to States (by compilation category) on the basis of state-wise value added in manufacturing (total, not institution-wise) as per last available ASI.	Current price estimates are deflated with the relevant WPI.	
Private Quasi-corporations	♦ ASI ♦ Index of Industrial Production (IIP) ♦ WPI: M/o Commerce and Industry	♦ State-wise estimates of GVA, by compilation category, obtained from ASI for the quasi-corporations (Factories covered under ASI but not registered under Companies Act). ♦ Till ASI becomes available, estimates of the preceding year are extrapolated using IIP and WPI.	Current price estimates are deflated with the relevant WPI.	

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
Private Unincorporated Enterprises	◆ NSS 67th Round ES, 2010-11 and 68th Round EUS, 2011-12 ◆ IIP ◆ WPI: M/o Commerce and Industry	◆ GVA at the national level for the year 2011-12 allocated using state-wise benchmark estimates of GVA compiled using value added per effective worker from NSS 67th Round and number of effective workers from NSS 68th Round. ◆ The benchmark state-wise estimates are moved to subsequent years using the state's growth rate of GVA-manufacturing as estimated by ASI to get the state-level estimate. ◆ Compilation category-wise estimates are compiled by allocating the state's estimate using base year structure of the state's GVA by compilation category. ◆ For the year when ASI is not available, the preceding year estimates are moved using IIP and WPI.	Current price estimates are deflated with the relevant WPI.	
8. Electricity, gas, water supply and other utility services				
(1) electricity				
Public corporations: Departmental Enterprises (DEs)	◆ Budget Documents of central & state governments ◆ Quantity of electricity sold: CEA	◆ Estimates of GVA compiled using production approach ◆ GVA of central DEs are allocated to the States on the basis of the location of the DE.	Base year estimate moved with the index of quantum sales of electricity	GVA of State DEs are allocated to the respective States. For the State-level data, Generation Overview Report (a monthly report) of Central Electricity

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
				Authority giving monthly electricity generated can be used to form the index.
Public corporations: Central Non- Departmental Enterprises Electricity generating companies (DVC, NEEPCL, NHPC, NLC, NPCIL, NTPC)	♦ Annual Reports of Public Sector electricity generating companies ♦ State-wise quantity of electricity generated and sold: CEA/concerned NDE	♦ Estimates of GVA compiled using production approach of these multi-state companies is allocated on the basis of state-wise electricity generated	Base year estimate moved with the index of quantum sales of electricity	
Public corporations: Central Non- Departmental Enterprises Power Grid Companies	♦ Annual Reports of Public Sector power grid companies ♦ State-wise number of employees & value of assets: Public Enterprises Survey of DPE ♦ State-wise quantity of electricity sold: CEA	♦ Estimates of GVA at current prices are estimated by the production approach and allocated to States in the case of multi-state NDEs. CE is distributed on the basis of the number of employees in each State in proportion to State-wise employment in that NDE, while OS is distributed in proportion to the State-wise gross block (Value of Assets) of that NDE.	Base year estimate moved with the index of quantum sales of electricity	In the case of single-state NDEs, the entire GVA is allocated to that State/UT.
Private Corporations	♦ MCA21 database for the annual reports of Private Sector Companies ♦ State-wise quantity of electricity generated and sold by private companies: CEA	♦ Estimates of GVA compiled using production approach and allocated on the basis of sum of number of units of electricity generated and number of units of electricity sold by private companies	Base year estimate moved with the index of quantum sales of electricity	The sum of number of units generated and number of units sold is taken assuming that the companies either generating electricity or involved in distribution.

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
(2) Gas				
Public Corporations: Central Non-Departmental Enterprises (NDEs) Gas generating companies (GAIL India Ltd.)	- Annual Reports of Public Sector electricity generating companies - State-wise quantity of gas sold: concerned NDE	- Estimates of GVA compiled using production approach - NDE-wise GVA is allocated among States based on state-wise gas sold by the NDE	Base year estimate moved with the index of quantum sales of gas.	Index of quantum sales of gas is based on the information available from GAIL. In the case of single-state NDEs, the entire GVA is allocated to that State/UT.
Public Corporations: Other Non-Departmental Enterprises (NDEs)	- Annual Reports of Public Sector Companies - State-wise number of employees & value of assets: Public Enterprises Survey of DPE	Estimates of GVA at current prices are estimated by the production approach and allocated to States. CE is distributed on the basis of the number of employees in each State in proportion to State-wise employment in that NDE, while OS is distributed in proportion to the State-wise gross block (Value of Assets) of that NDE.	Base year estimate moved with the index of quantum sales of gas.	Index of quantum sales of gas is based on the information available from GAIL. In the case of single-state NDEs, the entire GVA is allocated to that State/UT.
Private Corporations	MCA21 database for the annual reports of Private Sector Companies	Estimates of GVA compiled using production approach and allocated on the basis of state-wise revenue of the Companies	Base year estimate moved with the index of quantum sales of gas.	Index of quantum sales as used for Public Sector is assumed to be relevant for Private Corporations also
Private Unincorporated Enterprises: gobar gas	- State-wise Value of production: Khadi & Village Industries Commission (KVIC) - No. of bio gas plants: M/o Non-Conventional Energy	State-wise GVA is calculated as the value of production at current prices. This is duly adjusted for share of KVIC in total biogas plants installed up to current year.	Base year estimate moved with the index of no. of bio gas plants	Value of inputs is assumed to the same as the value of by-product, i.e. manure.

Item	Data: Source	Method of estimation		Remarks

(1)	(2)	(3)	(4)	(5)
(3) water supply				
General Government: State Administrative Departments	◆ Budget documents of state governments ◆ CPI from MOSPI	◆ Estimates of GVA compiled using production approach	Current price estimates are deflated with the CPI (General)	
Public corporations: Non-Departmental Enterprises	◆ Annual Reports of Public Sector Companies (exists only in Kerala - Kerala Water Authority) ◆ CPI from MOSPI	◆ Estimates of GVA compiled using production approach	Current price estimates are deflated with the CPI (General)	Kerala Water Authority being a single-state NDE, the entire GVA is allocated to Kerala.
Private Corporations	◆ MCA21 database for the annual reports of Private Sector Companies ◆ CPI from MOSPI	◆ Estimates of GVA compiled using production approach and allocated to the States on the basis of State-wise annual wages of workers in the industry as per NSS 68th Round.	Current price estimates are deflated with the CPI (General)	
Private Unincorporated Enterprises	◆ NSS 68th Round EUS, 2011-12 ◆ CPI from MOSPI	◆ For the base year, the estimate of GVA is calculated as Wage per day * Number of working days and allocated to the States on the basis of State-wise annual wages in the activity as per NSS 68th Round ◆ For the subsequent years, the growth rate of GVA at current prices of Private Corporate Sector at the national level in this category is used and allocated according to the base year proportions.	Current price estimates are deflated with the CPI (General)	

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
(4) remediation (recycling)				
Public & Private Corporations	♦ ASI ♦ IIP ♦ WPI: M/o Commerce and Industry	♦ State-wise GVA are obtained from the results of ASI. ♦ For the year when ASI is not available, the previous year's estimates are moved using IIP and WPI.	Current price estimates are deflated with the relevant WPI.	
Private Unincorporated Enterprises	♦ NSS 67th Round ES, 2010-11 and 68th Round EUS, 2011-12 (for the unorganised portion of recycling) ♦ IIP ♦ WPI: M/o Commerce and Industry	♦ National estimates of GVA have been allocated to the States on the basis of state-wise GVA as per NSS 67th Round ♦ The estimates for unorganised recycling are moved to subsequent years using IIP and WPI and are replaced by ASI when its results become available	Current price estimates are deflated with the relevant WPI.	IIP and WPI of 'Basic Iron and Steel + Casting of iron and steel' are used for this category.
(5) remediation (sewerage & sanitation)				
General Government: State Administrative Departments	♦ Budget documents of state governments ♦ CPI from MOSPI	♦ Estimates of GVA compiled using production approach	Current price estimates are deflated with the CPI (General)	
Private Corporations	♦ MCA21 database for the annual reports of Private Sector Companies ♦ CPI from MOSPI	♦ Estimates of GVA compiled using production approach in the case of Private Sector Companies and allocated on the basis of base GVA obtained from NSS 68th Round	Current price estimates are deflated with the CPI (General)	

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
Private Unincorporated Enterprises	◆ NSS 67th Round ES, 2010-11 and 68th Round EUS, 2011-12 ◆ CPI from MOSPI	◆ National estimates of GVA have been allocated to the States on the basis of state-wise GVA as per NSS 67th Round ◆ For the subsequent years, the growth rate of GVA at current prices of Private Corporate Sector at the national level in this category is used and allocated according to the base year proportions.	Current price estimates are deflated with the CPI (General)	
9. Construction				
General Government: Administrative Departments	◆ Budget documents for central & state governments ◆ Annual accounts of local bodies	(i) NVA of State Government in Construction is taken from State Government budget documents (ii) NVA of Central Government in Construction is allocated to States based on the information in the "works annexure" of the budget documents. (iii) CFC of GG is allocated on the basis of NVA as derived above and GVA is calculated as sum of NVA and CFC.	Deflated by General Pucca Construction Index	General Pucca Construction Index is a weighted index of prices of building materials (i.e. Cement, Iron & Steel Bricks and Timber), labour and fixtures & fittings.
Public Corporations: Departmental Enterprises	◆ Budget documents for central & state governments	Estimates of GVA are compiled using production approach in the industry. Estimates of central DEs are allocated to the States using state-wise outlay on construction.	Deflated by General Pucca Construction Index	GVA of State DEs are allocated to the respective States. General Pucca Construction Index as in the case of General Government.

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
Public Corporations: Non-Departmental Enterprises	♦ Annual reports of non-departmental commercial undertakings ♦ State-wise number of employees & value of assets: Public Enterprises Survey of DPE ♦ Length of highway awarded (Number of kilometres) in PPP and EPC projects: website of NHAI	Estimates of GVA at current prices are estimated by the production approach and allocated to States in the case of multi-state NDEs. In the case of NHAI, GVA is allocated using state-wise length of highways awarded under PPP and EPC projects in the year. In the case of other NDEs, CE is distributed on the basis of the number of employees in each State in proportion to State-wise employment in that NDE, while OS is distributed in proportion to the State-wise gross block (Value of Assets) of that NDE.	Deflated by General Pucca Construction Index	In the case of single-state NDEs, the entire GVA is allocated to that State/UT. General Pucca Construction Index as in the case of General Government.
Household sector				
Rural/Urban residential buildings (RRB) - new construction outlays plus repair & maintenance	♦ AIDIS 2013 for capital expenditure in rural & urban residential buildings and Census 2011 for number of dwellings ♦ NBO/States for prices of cement, I&S, bricks & timber and wages of urban labour	The state wise estimates of new construction and repairs & maintenance in respect of rural and urban residential buildings of AIDIS are moved to later years with the help of inter-censal growth rate in the number of dwellings. Price changes are imposed with the help of Rural/Urban Cost of Construction Index (CCI).	Deflated by Cost of Construction Index for Rural/Urban Housing	Cost of Construction Index (CCI) for Rural/Urban Housing is a weighted index of prices of building materials (i.e. Cement, Iron & Steel Bricks and Timber), labour. Additionally for the urban CCI, fixtures & fittings and 'other materials' are also considered. For labour, (CPI-R) is taken in the case of rural CCI and index of wage of urban labour for

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
				urban CCI.
Rural / Urban - non-residential buildings and other construction works (new construction plus repairs & maintenance)	♦ AIDIS 2013 for capital expenditure in R/U non-residential buildings and other construction works	The state wise estimates of new construction and repairs & maintenance in respect of rural and urban non-residential buildings of AIDIS are moved to later years with the help of combined index of value of output from Agriculture sector and manufacturing sector.	Deflated by General Pucca Construction Index	In the Combined Index of output of Agriculture and manufacturing, indices of output at current prices of agriculture and manufacturing are combined using their share in sum of output of agriculture and output of manufacturing.
Plantations in the household sector	♦ State-wise area under cultivation for plantation crops: NHB and Commodity Boards	All India estimates of GVO of construction in plantations in the household sector are distributed to the States using State-wise information on increment in area under cultivation of the plantation crops.	Deflated by CPI(R)	18 plantation crops namely, Coconut, Tea, Coffee, Rubber, Citrus fruits, pineapple, Cashew Nut, areca nut, banana, mango, grapes, papaya, apple, litchi, sapota, guava, pomegranate and cardamom considered
Other households	♦ Includes NPISH and unincorporated enterprises not covered in AIDIS	Obtained as residual through the commodity flow method of the household sector and allocated on the basis of a composite indicator using State-wise consumption of cement and iron & steel. (same as residual sector)	Deflated by General Pucca Construction Index	General Pucca Construction Index as in the case of General Government.

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
Residual Sector	Includes data on Private Corporate Sector and other un-allocated portion of GVA construction at the national level	Estimate allocated on the basis of a composite indicator using State-wise consumption of cement (weight: 19.66%) and iron & steel (weight: 80.34%).	Same as above	Combined growth of Cement (with weight: 19.66%) and iron & steel (with weight: 80.34%) can be used to extrapolate till allocation is available.
10. Trade & repair services				
Public Corporations: Departmental Enterprises	- Budget documents of central & state governments - CPI from MOSPI	Estimates of GVA compiled using production approach. GVA of central DEs are allocated to the States on the basis of the location of the DE.	Current price estimates are deflated using CPI (General)	GVA of State DEs are allocated to the respective States.
Public Corporations: Non-Departmental Enterprises	- Annual reports of NDEs - State-wise number of employees & value of assets: Public Enterprises Survey of DPE - CPI from MOSPI	Estimates of GVA at current prices are estimated by the production approach and allocated to States in the case of multi-state NDEs. CE is distributed on the basis of the number of employees in each State in proportion to State-wise employment in that NDE, while OS (OS = GVA - CE) is distributed in proportion to the State-wise gross block (Value of Assets) of that NDE.	Current price estimates are deflated using CPI (General)	In the case of single-state NDEs, the entire GVA is allocated to that State/UT.
Private Corporations				
Private Companies	- MCA21 database for the annual reports of Private Sector Companies - WPI: M/o Commerce and Industry	Estimates of GVA at current prices compiled using production approach and allocated on the basis of GVA estimated using GVAPW from NSS 67 th Round and labour input from NSS 68 th Round.	Current price estimates are deflated using CPI (General)	

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
Co-operatives	♦ NABARD publication, "Statistical Statements Relating to Cooperative Movement in India, 2004-05"	Estimates of GVA at current prices allocated on the basis of LI in the sector from NSS 68th Round. For subsequent years, GVA at current prices are obtained by extrapolation using index of sales tax.	Current price estimates are deflated using CPI (General)	
Private Unincorporated Enterprises	♦ NSS 68th Round EUS, 2011-12 and population Census 2011 ♦ NSS 67th Round ES, 2010-11 ♦ CPI from MOSPI	Base year State-wise GVA allocated using GVAPW from NSS 67th Round and labour input from NSS 68th Round. For subsequent years, GVA at current prices are obtained by extrapolation using index of sales tax.	Current price estimates are deflated by CPI (General)	
11. Hotels and Restaurants				
Public Corporations: Non-Departmental Enterprises (NDEs)	♦ Annual reports of NDEs ♦ State-wise number of employees & value of assets: Public Enterprises Survey of DPE ♦ CPI from MOSPI	Estimates of GVA at current prices are estimated by the production approach and allocated to States in the case of multi-state NDEs. CE is distributed on the basis of the number of employees in each State in proportion to State-wise employment in that NDE, while OS (OS = GVA - CE) is distributed in proportion to the State-wise gross block (Value of Assets) of that NDE.	Current price estimates are deflated using CPI (General)	In the case of single-state NDEs, the entire GVA is allocated to that State/UT.
Private Corporations	♦ MCA21 database for the annual reports of Private Sector Companies ♦ CPI from MOSPI	Estimates of GVA at current prices compiled using production approach and allocated on the basis of tourist arrivals (domestic + international tourists)	Current price estimates are deflated using CPI (General)	

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
Private Unincorporated Enterprises	◆ NSS 68th Round EUS, 2011-12 and population Census 2011 ◆ NSS 67th Round ES, 2010-11 ◆ CPI from MOSPI	Base year State-wise GVA compiled using GVAPW from NSS 67th Round and labour input from NSS 68th Round. For subsequent years, current prices estimates are obtained by using growth in the corporate sector	Current price estimates are deflated by CPI (General)	
12. Railways				
Railways	◆ Annual Railway Budget ◆ Annual reports of the NDEs ◆ MCA21 database for the annual reports of Private Sector Companies	Estimates of GVA are allocated on the basis of indicators like section-wise passenger and freight earnings, state-wise number of employees and the capital-at-charge in each zone.	Constant price estimates at the national level are estimated using the Implicit Price Deflator at the national level.	
13. Transport other than Railways and storage				
Public Corporations (Departmental & Non-Departmental Enterprises – DEs & NDEs)				
(i) Land Transport	◆ Budget documents of central & state governments ◆ Annual reports of the NDEs ◆ State-wise number of employees & value of assets: Public Enterprises Survey of DPE ◆ Number of registered vehicles from M/o Road Transport	Estimates of GVA compiled using production approach. GVA of central DEs are allocated to the States on the basis of the location of the DE. In the case of Central NDEs, except in the case of air transport, estimates of GVA at current prices are estimated by the production approach and allocated to States. CE is distributed on the basis of the number of employees in each State in proportion to State-wise employment in	Base year estimates are moved using index of registered vehicles	In the case of single-state NDEs, the entire GVA is allocated to that State/UT.
(ii) Water Transport			Current price estimates are deflated by CPI(transport & communication)	
(iii) Services incidental to transport			Previous year's estimate extrapolated with the combined growth of GVA of water+air+land transport at constant prices	

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
(iv) Storage & warehousing	♦ CPI from MOSPI	that NDE, while OS (OS = GVA - CE) is distributed in proportion to the State-wise gross block (Value of Assets) of that NDE.	Current price estimates are deflated by CPI(misc)	
Private Corporations				
All categories given below	♦ MCA21 database for the annual reports of Private Sector Companies ♦ NSS 63 rd Round ES, 2006-07 for Cooperatives (for land and water transport)	Estimates of GVA compiled using production approach and allocated on the basis of GVA estimated using GVAPW from NSS 67 th Round and labour input from NSS 68 th Round.		
(i) Land Transport	♦ Number of registered vehicles from M/o Road Transport	Constant price estimates of GVA are inflated using CPI(transport & communication)	Base year estimates are moved using index of registered vehicles	
(ii) Water Transport	♦ Cargo handled at ports from M/o Shipping ♦ CPI from MOSPI	GVA at the national level is allocated using share of cargo handled and length of navigable rivers.	Current price estimates are deflated by CPI(transport & communication)	
(iii) Services incidental to transport	♦ CPI from MOSPI	Previous year's estimate extrapolated using combined growth of (water+air+land transport) at current prices	Previous year's estimate extrapolated using combined growth of (water+air+land transport) at constant prices	
(iv) Storage & warehousing		GVA at the national level is allocated using base year proportions as given above	Current price estimates are deflated by CPI(Miscellaneous)	

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
Air transport (Public and Private Corporations)	◆ Annual reports of the NDEs ◆ MCA21 database for the annual reports of Private Sector Companies ◆ M/o Civil Aviation for passenger traffic. ◆ CPI from MOSPI	Estimates of GVA compiled using production approach. GVA at the national level is allocated to states on the basis of passengers handled by the airports in the state during the year.	Current price estimates are deflated by CPI(transport & communication)	
Private Unincorporated Enterprises				
(i) Land Transport	◆ NSS 68th Round EUS, 2011-12 and Population Census 2011 ◆ NSS 67th Round ES, 2010-11 ◆ M/o Transport for registered vehicles ◆ CPI from MOSPI	Constant price estimates are inflated using CPI (Transport & communication).	Base year state-wise GVA estimates are compiled using GVA from NSS 67 th Round and LI from NSS 68 th Round. For subsequent years, these are moved using growth in registered vehicles.	
(ii) Water Transport	◆ NSS 68th Round EUS, 2011-12 and Population Census 2011 ◆ NSS 67th Round ES, 2010-11. ◆ CPI from MOSPI	Base year state-wise GVA estimates are compiled using GVA from NSS 67 th Round and LI from NSS 68 th Round. For subsequent years, GVA at national level allocated using index of navigable length plus cargo handled.	GVA at current prices deflated using CPI (transport & communication).	
(iii) Air Transport	No household enterprises in this industry			
(iv) Storage & warehousing	◆ NSS 68th Round EUS, 2011-12 and Population Census 2011 ◆ NSS 67th Round ES, 2010-11. ◆ CPI from MOSPI	Base year state-wise GVA estimates are compiled using GVA from NSS 67 th Round and LI from NSS 68 th Round; these are used as proportions to allocate the national level GVA at current prices.	Current price estimates are deflated using CPI(Miscellaneous).	

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
(v) Services incidental to transport	◆ NSS 68th Round EUS, 2011-12 and Population Census 2011 ◆ NSS 67th Round ES, 2010-11.	Base year state-wise GVA estimates are compiled using GVA from NSS 67th Round and LI from NSS 68th Round. For subsequent years, combined growth of (water+land transport) at current prices used to extrapolate the base year estimates.	Base year state-wise GVA estimates are compiled using GVA from NSS 67th Round and LI from NSS 68th Round. For subsequent years, combined growth of (water+land transport) at constant prices used to extrapolate the base year estimates.	
14. Communication & Services related to broadcasting				
Public corporations	◆ Budget document of Department of Posts ◆ Annual reports of NDEs ◆ CPI from MOSPI	Estimates of GVA compiled using production approach. Estimates of GVA allocated in the case of Deptt of Posts and Central NDEs of communication on the basis of indicators like receipts, rent, interest, etc. In case of broadcasting (Prasar Bharati), it has been allocated on the basis of sanctioned strength.	Current prices estimates are deflated using CPI (transport and communication)	In the case of single-state NDEs, the entire GVA is allocated to that State/UT.
Private Corporations				
Courier activities, Cable operators, Telecommunication and Recording, publishing & Broadcasting services	◆ MCA21 database for the annual reports of Private Sector Companies ◆ NSS 63rd Round ES, 2006-07 for Cooperatives (for telecommunication) ◆ CPI from MOSPI	Estimates of GVA compiled using production approach. GVA from courier activities has been allocated on the basis of GVA of Posts. GVA of Cable operators, Recording, publishing & Broadcasting services has been allocated on the basis of population having television in Census 2011. GVA of Telecommunication in the base	Current prices estimates are deflated using CPI (transport and communication)	

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
		year has been allocated on the basis of average number of subscribers in the base year. This has been extrapolated using growth in subscribers and CPI(transport & communication) for the subsequent years.		
Private Unincorporated Enterprises				
Courier activities, Cable operators, Telecommunication, Recording, publishing & Broadcasting services	◆ NSS 68th Round EUS, 2011-12 and Population Census 2011 ◆ NSS 67th Round ES, 2010-11 ◆ CPI from MOSPI	Base year GVA as compiled using GVA from NSS 67 th Round and LI from NSS 68 th Round has been allocated on the same criteria as used in the Private Corporate Sector.	Current prices estimates are deflated using CPI (transport and communication)	
15. Real estate, Ownership of Dwellings and Professional Services				
Public Corporations: Non-Departmental Enterprises Real estate and Professional Services	◆ Annual accounts of NDEs ◆ State-wise number of employees & value of assets: Public Enterprises Survey of DPE ◆ CPI from MOSPI	Estimates of GVA at current prices are estimated by the production approach. In the case of multi-state NDEs, it is allocated to the States. CE is distributed on the basis of the number of employees in each State in proportion to State-wise employment in that NDE, while OS (OS = GVA - CE) is distributed in proportion to the State-wise gross block (Value of Assets) of that NDE.	Current year estimates are deflated using CPI(Miscellaneous)	In the case of single-state NDEs, the entire GVA is allocated to that State/UT.

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices

Private Corporations				
Real Estate and Professional Services	◆ MCA21 database for the annual reports of Private Sector Companies ◆ CPI from MOSPI	Estimates of GVA compiled using production approach has been allocated on the basis of Base year GVA as compiled using GVA from NSS 67 th Round and LI from NSS 68 th Round.	Estimates at current prices are deflated using CPI (Miscellaneous)	
Computer and Information related Services	◆ MCA21 database for the annual reports of Private Sector Companies ◆ State-wise software exports made by units registered under Software Technology Parks of India (STPI): STPI ◆ CPI from MOSPI	Estimates of GVA compiled using production approach have been allocated on the basis of information on State-wise software exports made by units registered under STPI.	Estimates at current prices are deflated using CPI (Miscellaneous)	
Private Unincorporated Enterprises				
Real Estate, Professional Services and Computer and Information related Services	◆ NSS 68th Round EUS, 2011-12 and Population Census 2011 ◆ NSS 67th Round ES, 2010-11 ◆ CPI from MOSPI	Base year GVA has been allocated on the basis of GVA as compiled using enterprise information from NSS 67 th Round and LI from NSS 68 th Round. For the subsequent years estimates are moved using Corporate Growth (same as in organised sector)	Estimates at current prices are deflated using CPI (Miscellaneous)	
Ownership of dwellings	The GVA for the ownership of dwellings is equivalent to gross rental of the residential census houses less the cost of repairs and maintenance. <u>Details for rural & urban dwellings are given below:</u>			

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
Urban dwellings	- Population Census 2011 for number of residential houses - CPI (R) & CPI (U) from MOSPI - NSS 68th Round CES, 2011-12 for rent per household	Gross rental=no. of census houses (urban) * rent per household as obtained from CES for the base year. For years subsequent to the base year, Rent per household as in the base year is extrapolated using the index of house rent (urban areas) and the number of dwellings is extrapolated using the inter-censal growth rate of urban dwellings.	Estimates of Urban GVA are obtained by moving the base year estimate with inter censal growth rate of dwellings.	In the absence of updated information on the number of dwellings, the inter-censal growth rate is assumed to be valid till the next Population Census.
Rural dwellings	- Capital Stock at current and constant prices of rural residential buildings as estimated using perpetual inventory method - CPI (R) from MOSPI	Gross rental at the national level is estimated through user cost approach, using the capital stock of rural residential buildings. The national level estimates are allocated to States using state-wise stock of rural dwellings as estimated from AIDIS, duly extrapolated for the reference year using growth in the number of dwellings and CPI(R).	Estimates of Rural GVA are obtained by deflating the current price estimates using CPI(R)	In the user cost measure, the net operating surplus is imputed using the opportunity cost principle; i.e. the net operating surplus is estimated on the basis of what owner occupiers could have earned on alternative investments (if they had not bought the dwelling). Then, the dwelling costs (intermediate consumption and consumption of fixed capital) are added to the imputed net operating surplus to obtain the imputed rent.

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
16. Financial Services				
Financial Services	♦ Number of employees, deposits, credits, life insurance premiums, etc. from various financial institutions	Estimates of GVA are split into CE, Rent, Profit, etc. and are allocated by CSO at the enterprise level using the information like state-wise salaries, deposits, premiums and number of employees	Current price estimates are deflated by the implicit price deflator for financial services as derived at the national level.	
17. Public administration and defence				
Central Government	♦ Budget document of central government	Estimates of GVA at current prices are allocated on the basis of number of central government employees across States	Current price estimates deflated by the CPI (General)	
State Governments & Local Bodies	♦ Budget documents from state governments and annual accounts of local bodies	Estimates of GVA at current prices compiled using production approach	Current price estimates deflated by the CPI (General)	
Autonomous Institutions	♦ Annual Accounts of sampled Central Autonomous Institutions and State Autonomous Institutions	Estimates of GVA are compiled using production approach for the sample autonomous institutions for the base year and these benchmark estimates have been projected at the national level with the help of total grants given to all autonomous institutions. These are allocated to the States on the basis of indicators like location of these institutions and state wise public sector LI proportions as per NSS 68 th Round. Estimates of GVA are compiled using production approach for the State autonomous institutions and allocated to	Current price estimates deflated by the CPI (General)

		the respective states.		
18. Other Services				
Public Sector (General Government and Public Corporations, i.e., DEs & NDEs)				
General Government: Administrative Departments and Public Corporations in Education, Health and Recreation	♦ Budget documents of state governments ♦ Annual reports of NDEs ♦ State-wise number of employees & value of assets: Public Enterprises Survey of DPE ♦ CPI from MOSPI	Estimates of GVA at current prices are estimated by the production approach. In the case of Central NDEs, GVA is allocated to States. CE is distributed on the basis of the number of employees in each State in proportion to State-wise employment in that NDE, while OS (OS = GVA - CE) is distributed in proportion to the State-wise gross block (Value of Assets) of that NDE.	Current price estimates are deflated using CPI for Education and Health in the case of GVA of Education & Health Services and CPI (Miscellaneous) in the case of GVA of Recreation	In the case of single-state NDEs, the entire GVA is allocated to that State/UT.

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
General Government: Autonomous Institutions in Education & health	◆ Annual Financial Accounts of sampled Central Autonomous Institutions and State Autonomous Institutions ◆ CPI from MOSPI	Estimates of GVA are compiled using production approach for the sample autonomous institutions for the base year and these benchmark estimates have been projected at the national level with the help of total grants given to all autonomous institutions. These are allocated to the States on the basis of indicators like location of these institutions and state wise public sector LI proportions as per NSS 68th Round. Estimates of GVA are compiled using production approach for the State autonomous institutions.	Current price estimates deflated by the CPI (General)	
Private Corporations				
Coaching centres + Activities of the individuals providing tuition + Education excluding Coaching	◆ MCA21 database for the annual reports of Private Sector Companies ◆ NSS 63rd Round ES, 2006-07 for Co-operatives ◆ CPI from MOSPI	Estimates of GVA compiled using production approach and allocated for the base year on the basis of LI from NSS 68th Round. For subsequent years, previous year's estimate moved using state-wise inter-survey growth, between NSS 64th and NSS 71st Rounds, in the expenditure on education.	Current price estimates deflated using CPI(education)

Human health activities+ care services	♦ MCA21 database for the annual reports of Private Sector Companies ♦ NSS 63rd Round ES, 2006-07 for Co-operatives ♦ CPI from MOSPI	Estimates of GVA compiled using production approach and allocated for the base year on the basis of LI from NSS 68th Round. For subsequent years, previous year's estimate is moved using state-wise inter-survey growth, between NSS 64th and NSS 71st Rounds, in the expenditure on health.	Current price estimates deflated using CPI(health)	
Remaining social & personal services	♦ MCA21 database for the annual reports of Private Sector Companies ♦ NSS 63rd Round ES, 2006-07 for Co-operatives ♦ CPI from MOSPI	Estimates of GVA compiled using production approach and allocated on the basis of LI from NSS 68th Round.	Current price estimates deflated using CPI (Miscellaneous)	
Private Unincorporated Enterprises				
Coaching centres + Activities of the individuals providing tuition + Education excluding Coaching	♦ NSS 68th Round EUS, 2011-12 ♦ NSS 64th and 71th Rounds on Expenditure on Education, 2007-08 & 2014, respectively ♦ NSS 67th Round ES, 2010-11 ♦ CPI from MOSPI	Base year GVA has been allocated on the basis of GVA from NSS 67th Round and LI from NSS 68th Round. For subsequent years, previous year's estimate moved using state-wise inter-survey growth, between NSS 64th and NSS 71st Rounds, in the expenditure on education.	Current price estimates deflated using CPI(education)	

Item	Data: Source	Method of estimation		Remarks
		At current prices	At constant (2011-12) prices	
(1)	(2)	(3)	(4)	(5)
Human health activities+ care services	◆ NSS 68th Round EUS, 2011-12 ◆ NSS 61st and 68th Rounds CES, 2004-05 & 2011-12, respectively ◆ NSS 67th Round ES, 2010-11 ◆ CPI from MOSPI	Base year GVA has been allocated on the basis of GVA from NSS 67th Round and LI from NSS 68th Round. For subsequent years, previous year's estimate moved using state-wise inter-survey growth, between NSS 61th and NSS 68th Rounds, in the consumer expenditure on health.	Current price estimates deflated using CPI(health)	
Remaining social & personal services	◆ NSS 68th Round EUS, 2011-12 ◆ NSS 67th Round ES, 2010-11 ◆ NSS 61st and 68th Rounds CES, 2004-05 & 2011-12, respectively ◆ CPI from MOSPI	Base year GVA has been allocated on the basis of GVA from NSS 67th Round and LI from NSS 68th Round. For subsequent years, previous year's estimate moved using inter-survey growth in consumer expenditure in non-food items(excluding education and health)	Current price estimates deflated using CPI (misc. services)	
Private Households with employed persons	◆ NSS 61st Round EUS, 2004-05 ◆ NSS 68th Round EUS, 2011-12	Base year GVA has been allocated on the basis of LI from NSS 68th Round. For subsequent years, previous year's estimate moved using inter-survey growth of LI (between NSS 61st Round and NSS 68th Round) and CPI (General).	Previous year's estimate moved using inter-survey LI growth.
